

ANTIKAMNIA AND ITS THERAPEUTIC INDICATIONS.

Antikamnia is an American product, and conspicuous on this account and because of the immense popularity which it has achieved, it is to-day in greater use than any other of the synthetically produced antipyretics. The literature is voluminous, and clinical report from prominent medical men in all parts of this country, with society proceedings and editorial references, attest its value in actual practice in an endless variety of diseases and symptomatic affections, such as the neuralgia, rheumatism, typhoid and other fevers, headaches, influenza and particularly in the pains due to irregularities of menstruation. Antikamma has received more adverse criticism of a certain spiteful kind, particularly directed against its origin—and because of its success—than any other remedy known; critics have seemed personally aggrieved because of its American source, and that it did not emanate from the usual "color works," but their diatribes have fallen flat as do most persecutions and unreasonable and petty prejudices. The fact stands incontrovertible that antikamnia has proved an excellent and reliable remedy, and when a physician is satisfied with the effects achieved he usually holds fast to the product. That is the secret and mainspring of the antikamnia success. It is antipyretic, analgesic, and anodyne and the dose is from 5 to 10 grains, in powder, tablets or in konseals taken with a swallow of water or wine. When prescribing Antikamnia, particularly in combination with other drugs, it is desirable to specify "in konseals," which are rich flour capsules, affording an unequalled vehicle for administering drugs of all kinds.

ENTERO-COLITIS AND CHOLERA INFANTUM.

Antiphlogistine produces results in cholera infantum that can not be obtained in any other way. Pain is reduced, restlessness is soothed and the tossing, moaning patient falls into a quiet restful sleep. And why not? A moment's thought will convince you that, since the intestines and possibly the peritoneum are inflamed, an application which so rapidly reduces inflammation in other parts of the body must have a beneficial action here. Consider also, that in this case, acting directly upon and reflexly through the solar and hypogastris plexuses, it relieves the shock which is so invariably a serious part of the symptom complex.

Apply hot to the abdomen about $\frac{1}{2}$ -inch thick and cover with absorbent cotton.
