A CARD FROM

THE AMERICAN WATCH COMPANY CP

WALTHAM, MASS.

THIS Company beg leave to inform the citizens of the new dominion of Canada that they have made arrangements to introduce their celebrated Watches to their notice. They are prepared to prove that their watches are made upon a better system than others in the world.

They commenced operations in 1850, and their factory now covers four acres of ground, and has cost more than a million dollars, and employs over 700 operatives. Taey produce 75,000 Watches a year, and make and sell not less than one half of all the watches sold in the United States. Up to the present time, it has been impossible for them to do more than supply the constantly increasing home demand; but recent additions to their works have enabled them to St. Sylvester, April 5, 1867. turn their attention to other markets.

The difference between their manufacture and the European, is briefly this: European Watches are made almost entirely by hand. In them, all those mysterious and infinitesimal organs which when put together create the watch, are the result of slow and toilsome manual processes, and the result is of necessity a lack of uniformity, which is indispensable to correct time-keeping. Both the eye and the hand of the most skillful operative vary. But it is a fact that, except wat; hes of the higher grades, European watches are the product of the cheapest labor of Switzerland, and the result is the worthless Aucres, Lepins and so-called Patent Levers—which soon cost more in attempted repairs, than their original price. Common workmen, boys and women, buy the rough separate parts of these watches from various factories polish and put them together, and take them to the nearest watch merchant. He stamps and engraves them with any name or brand that may be ordered whether London, Paris, Geneva or what not; and many a man who thinks he has a genuine "M.I. Tobias, of Liverpool," (whose only fault is, that he can never regulate it to keep very good time), is really carrying a cheap and poor Swiss imitation. HOW AMERICAN WATCHES ARE MADE.

The American Waltham Watch is made by no such uncertain process-and by no such incompetent workmen. All their operations, from the reception of the raw materials-the brass the steel, the silver the gold and the precious stones, to the completion of the Watch, are carried on under one roof, and under one skillful and competent director. But the great distinguishing feature of their Watches, is the fact that their several parts are all made by the finest, the most perfect and delicate machinery ever brought to the aid of human industry. Every one of the more than a hundred parts of every watch is made by a machine-that infallibly reproduces every succeeding part with the most unvarying accuracy. It was only necessary to make one perfect watch of any particular style and then to adjust the hundred machines necessary to reproduce every part of that watch, and it follows that every succeeding watch must be like it. If any part of any American Waltham Watch should be lost or injured, the owner has only to address the Company, stating the number of his watch and the part wanted, whether it be spring, pinion, jewel, or what not, and by return mail be would receive the desired article, which any watchmaker would adjust to its position.

The Company respectfully submit their watches on their merits only. They have fully succeeded in overcoming popular prejudice in the States in favor of European watches, and solicit a thorough examination and fair trial for their manufactures elsewhere. They claim to make

A BETTER ARTICLE FOR THE MONEY by their improved mechanical processes than can be made under the old-fashioned handicraft system .-They manufacture watches of every grade, from a good, low priced, and substantial article, in solid silver hunting cares, especially adapted to the wants of the farmer and lumberman, to the finest chroncmeter for the navigator; and also ladies' watches in plain gold or the finest enameled and jeweled cases; but the indispensable requisite of all their watches is that they shall be GOOD TIMEKEEPERS. It should be remembered that, except their single lowest grade named "Home Watch Company, Boston," ALL WATCHES made by them

ARE FULLY WARRANTED

by a special certificate given to the purchaser of every watch by the seller, and this warrantee is good at all times against the Company or its agents.

S. T .- 1860. - X . - The amount of Plantation Bitters sold in one year is something startling .-They would fill Broadway six feet high, from the Park to 4th street. Drake's manufactory is one of the institutions of New York. It is said that Drake painted all the rocks in the Eastern States with his cabalistic "S. F.—1860.—X." and then got the old granny legislators to pass a law "preventing disfi-guring the face of nature," which gives him a mono-We do not know how this is, but we do know the Plantation Bitters sell as no other article ever did. They are used by all classes of the community, and are death on Dyspepsia-certain. They are very invigorating when languid and weak, and

What Did It! - A young lady, returning to her country home after a sojourn of a few months in New York, was hardly recognized by her friends. In place of a rustic, flushed tace, she had a soft, ruby complexion, of almost marble smoothness; and in-stead of 22, she really appeared but 17. She told them plainly she used Hagan's Magnolia Balm, and would not be without it. Any lady can improve her personal appearance very much by using this article. it can be ordered of any druggist for only 50 cents. SARATOGA SPRING WATER, sold by all Drug-

Heimstreet's inimitable Hair Coloring has been stendily growing in favor for over twenty years. It acts upon the absorbents at the roots of the hair, and changes it to its original color by degrees All instantaneous dyes deaden and lojure the hair.
