# New York Post-Graduate Medical School and Hospital

FIFTEENTH YEAR—SESSIONS OF 1896-97.

The Post-Graduate Medical School and Hospital is now permanently located in its new building, which has been erected to fill all the modern requirements for a hospital and medical school. It is an eight-story fire-proof structure, containing accommodations for 75 patients. The babies' wards, formerly in the adjacent building, are now an integral part of the institution under its own roof. The classes in the school have been so large in the last few years, and facilities for attending them so cramped, that this building has been erected, not only for the classes of practitioners, but also that more patients might be received, in order to form a great teaching hospital. This has now been accomplished, and every opportunity, both in the dispensary and hospital, is afforded in all departments of medicine and surgery. The great major operations are performed in the amphitheatre of the institution, which is fitted up in the very best manner to secure best surgical results. Pathological and Histological Laboratories are also a part of the school. The Faculty are also connected with most of the great hospitals and dispensaries in the city, where other clinics are held for the benefit of the matriculates of the Post-Graduate Medical School. Practitioners may enter at any time.

Members of the profession who are visiting New York for a day or two, will be heartily welcomed at the Post-Graduate School, and if they desire to attend the clinics, a visitors' ticket good for two days will be furnished them on application to the Superintendent.

**D. B. ST. JOHN ROOSA, M.D., LL.D., President,**

**CHARLES B. KELSEY, M.D., Secretary of the Faculty.**

**ALEXANDER H. CANDLISH, Superintendent.**

Cor. Second Ave. & 20th Street, New York City.

Physicians coming to the School will please ask for the Superintendent.
