

**Our Counter Balanced  
Elevator Doors**

are a new feature for elevator openings, made of wood tin clad, or of Corrugated Iron. In opening half goes up, the other half down. Both sides being exactly alike, it makes the door a counterbalance in itself, making it very easy to open and close, yet simple and durable. Two consecutive doors cannot be open at the same time. Let us send you our Catalog on these. It will interest you.
