Archdeacon H. A. Cody,
Care Toronto University,
Toronto, Ontario.

Has your Committee which visited Europe to study Cancer Research made its report to the Government of Ontario? If so, has the report been published, and where can I get a copy of it?

At our University there is a certain amount of Cancer Research going on, but no definite research department has been set up. We have in our Maternity Hospital a small cancer clinic. I have received \$25,000, which the donor wishes to be used for Cancer Research at McGill. What, in your opinion, is the best thing for me to do? Should I put on a worker or two, counting on using the whole amount up in five years, or should I devote it to Cancer Clinics?

I would appreciate very much your advice.

Ever yours faithfully,

Principal
