THE NEW SOAP

NASCO is a liquid Soap, manufactured from the purest ingredients, and contains no ammonia, soda, free acid or other injurious chemicals. NASCO mixes instantly with warm water, and without rubbing washes blankets, woollens, flannels, silks, curtains, laces and all fabrics of the most delicate nature. It brightens the colours and adds lustre. It improves the texture of woollens and flannels, leaving them beautifully soft without shrinking. Linens and cotton goods can be washed in warm water without boiling. NASCO removes grease, paint, verdigris, pitch and tar, blood, fruit or other stains. It also washes painted or unpainted woodwork, cleans cutlery, silver plate, dairy and kitchen utensils. NASCO requires no soda, borax or other mixture with it, and as rubbing is not necessary, clothes washed in it will last much longer. NASCO contains a newly discovered disinfectant fluid, which at a strength of one in twenty will destroy the germs of cholera, typhoid and other microbes. It is, therefore, an ideal sanitary washer and cleanser. It will cleanse carpets and leather, and will brighten the colours. It is a delicious toilet requisite, and forms a delightful addition to the bath. It is unrivalled as a shampoo, and gives a soft and glossy appearance to the hair. It is as effective for all purposes in cold or hot water, and is as cheap as common soap. In short, NASCO is a household necessity, and when once tried will be always used.
