

best of them, but none were willing to take up the challenge. One of my neighbors got an Abell machine to thresh for him this season, and when they got through he told them that if he had employed a "Climax" it would have done the same work in half the time. If you want any testimonials from parties for whom I have threshed, I can get them from the best farmers in this section of the country. If you or any of your men will be down this way, we would be glad to have you call and see us. Wishing you success, I remain,

Yours truly,

ADAM BANNERMAN.

LOGAN, CO. PERTH, NOV. 23, 1872.

MESSRS. GLASGOW, MACPHERSON & Co., Clinton.

GENTLEMEN,—We have much pleasure in stating that the machine which we purchased from you, a Climax Double Cylinder, gives us entire satisfaction, and performs its work superior to any we have ever seen during ten years' competition with other machines. We have therefore much pleasure in recommending any person in want of a first-class machine to patronize you.

Respectfully yours,

JAMES SMITH.

MARK EDMONDSON.

CHATHAM, 29th April, 1871.

MESSRS. MACPHERSON, GLASGOW & Co.

GENTLEMEN,—In acknowledging the receipt of your letter of the 25th of February last, in reference to my opinion of your Climax Double Cylinder Threshing Machine, I must beg to explain that I was not aware of the existence of your letter, until yesterday. In looking over one of the local papers (the Chatham Planet) I noticed my name among the list of Advertised letters, and to my surprise found it to be the letter above referred to. The mistake or delay may have been caused by your having directed your letter to Chatham P. O. instead of Louisville P. O., township of Chatham, where I am now living. I should have had much pleasure in sending you my own testimonial, as also for others for whom I have threshed last year; and yet it seems hardly necessary, as your Climax Double Cylinder Machines need no recommendation from any one, as they must commend themselves to every one who may use them as the best ever used in the Dominion. And I believe every one for whom I have threshed will not hesitate to certify to this fact, that last season was the best in one respect and in another the worst, to test the capabilities of the machines. we have ever had in this quarter. I threshed grain with the Climax without the least difficulty that I could not have threshed with any other machine I ever had not even the one you formerly made. With best wishes, I remain, gentlemen,

Yours truly,

L. H. ARNOLD.
