He needn't feel overlooked. There may be another royal duke to introduce him to, or the Deep Waterways Convention may want a delegate badly some time or other, or he may secure a publisher of a book on the "Commercial Possibilities of Communication With Mars," and we will read it, at least somebody, we suppose, will read it. In any event, Mr. Howland shouldn't handle too small things, such as imputing sinister motives to gentlemen who were of material service to the city at a traving time.

So the whole Flock came perforce to a standstill, unable to advance or to feed in peace, while the noisy quarrel continued. The Pushful Ganthat, notwithstanding the practical eli-mination of South Africa, which contri-buted nearly \$73,000,000, or 23 per cent. of the world's total gold product, cent. of the world's total gold product, in 1899, the total amount of gold won flast year in all the world exceeded that in 1900 by about \$38,000,000, and equalled nearly 95 per cent. of the maximum year, 1899.

In 1898 South Africa was the leading source of supply, with the United States second and Australasia third. In 1899 Auhtralasia was credited with the largest output, \$78,755,000; the United States (third, with \$70,096,000. Russia fourth, with \$23,963,000; and Canada fifth, with \$21,049,000.

Meanwhile the contention came to such a pass that feathers were like to have freely dotted the Green. At length the Pushful Gander. Seeing that a fight was impending, in which his own plumage might be besputtered, called in a large party of Eutcher Birds to establish peace. But now a number of wise Ganders, who had already been at much palns to bring the disputants to reason, renewed their efforts as peace-makers with good success. But the Vain and Pushful Leader, fearful lest he should loose prestige with the Flock and enviour also of the wise Ganders who had outstripped him in diplomacy, soon aftempted to set the factions once again at odds. But in so doing he only revealed with great clearness, and much to the disgust of even the Gesse and the Goodings that he was in no

Canada advanced to third place with \$27.908,000, largely on the output from the Klondike. Russia came fourth with \$22.167,000, and British India took sixth place with \$10,-597,000.

Last year (1901) the United States maintained the lead with \$80,211,000.

HUDSON'S DRY SOAP and common soap cost about the same, and the former is an all-soap soap.

That means that it will go further and do more work.

Anything that will help the bouse-keeper to accomplish better results in a shorter time and with less labor is worthy of earnest attention.

We don't claim that HUDSON'S DRY SOAP is infallible always, nor do we say that it will accomplish its work unaided by intelligent usage and care. Given these, it will yield results that will prove to you, as to millions before you, that it has no equal in the realm of cleansers. of cleansers.
