MIDDLESEX COUNTY COUNCIL
Make Provision to Redeem the House of Refuge Debentures—Sheriff Cameron's Report on the Employment of Prisoners.

WEDNESDAY AFTERNOON.

Middlesex county council resumed business at 2 o'clock. The report of the finance committee, which was adopted, recommended that as the \$20,000 house of refuge debentures fall due on Dec. 31, the warden and treasurer be empowered to convert \$13,000 of Middlesex proper debentures into cash, and pay the same out of the sinking fund to the credit of Middlesex proper. This will free the Huron portion of Middlesex from any indebtedness whatever. The treasurer is authorized to borrow from the cash in hand such sum as may be required to increase the sinking fund of Middlesex proper to \$13,000. The payment of a large number of accounts was also recommended.

The motion of G. B. Campbell, for a grant of \$200 to assist in building a lock-up in Glenora, was laid over for further consideration. Sheriff Cameron's report as to the number of days' labor in the jail was referred to the jail committee. The total number of days' work was 1,947, of which 600 was performed on the outside, 341 days in the court house and offices, and 1,046 days inside the jail. A statement showing how the prisoners were employed was also referred to the jail committee. In this the sheriff says: "While some of the work was very profitable to the county, I would have been glad had more of such work been available to keep the prisoners employed. An idle prisoner is a much worse character than the same individual employed. This rule is general, as well as inside the jail, and I will be glad to confer with your jail committee at any time to discuss this in my opinion, very important question."

J. D. Balfour, M.D., superintendent of the city hospital, requested the payment by the county of \$300 on account to the hospital trust. There have been 1,900 days' stay of county patients in the general hospital up to Nov. 30. Referred to finance committee.

Accounts from the Children's Aid Society for \$238.72 were received. Among them was one for \$19.28, from the Sisters of St. Joseph, of the city.

The clerk of Carleton notified the council that a deed had been executed by the county, conveying to the corporation of Carleton land for a road allowance, four rods in width, leading from their present traveled road to the proposed road, on the line between the county and the city. Referred to finance committee.

The report of Bridge Commissioner T. B. T. was referred to the board. The following bridges have been erected in 1908: Theford bridge, over Aux Sable River, between Lambton and Middlesex; Kilworth bridge, over the Thames at Kilworth; Tait bridge, over the Thames, between Middlesex and Elgin; a bridge between Parkhill and West Williams; bridge between Delaware and Westminster, opposite lot 9, con. 4, of Delaware, and one between Westminster and Southwold. The above are the bridges erected with the exception of the last mentioned, which has a concrete substructure, and an iron superstructure. The following will require rebuilding: The bridge over Mud Creek, on the boundary line between Middlesex and Huron; one over Mud Creek between McGillivray and East Williams; bridge between the Sabie Plains on the boundary line between McGillivray and West Williams.

In the Matter of Sidewalks.
To the Editor of The Advertiser:

As a ratepayer of the city of London, I am glad that Ald. Jolly has made a move against shoddy sidewalks, and believing in true economy by working on permanent lines, and doing work once only, I wish to draw the attention of the ratepayers of the city of London to the rapid rate at which London has been laying down wooden sidewalks. There have been laid in 1898 probably

DR. CHASE'S KIDNEY-LIVER PILLS
All the most painful and fatal diseases arise from deranged kidneys. The liver and stomach are affected; indigestion, constipation, biliousness, and constipation are an accompaniment; headache, loss of energy and ambition, a dragging down feeling, low spirits and despondency; these are some of the symptoms.

Dr. Chase's Kidney Liver Pills are the world's greatest kidney cure, because they act directly on the kidneys and restore them to health, strength and vigor. They remove the cause of headache, backache, and an endless chain of most fatal and complicated diseases.

Dr. Chase's Kidney Liver Pills cure Bright's Disease, diabetes, rheumatism and kidney disease, after skilled physicians have failed.

Dr. Chase's Kidney Liver Pills are purely vegetable, and act pleasantly and naturally. One pill a dose; 25 cents a box.

At All Dealers, or EDMANSON, RATES & CO., Toronto Ont.

twelve or thirteen miles, and some have been laid right in the heart of the city—shoddy when compared to Portland concrete sidewalks, when laid by respectable contractors who understand their business and have a reputation to lose, and working under a specification drawn up by an expert. We have the best raw material for this work close to the city, and under good management can have one of the best permanent sidewalks and the cheapest concrete sidewalks. When durability is considered, nearly all the progressive cities and towns in Ontario have for years been laying down permanent concrete sidewalks. Now we have not taken the lead with permanent sidewalks, let us follow such enterprising cities and towns with advanced ideas, such as St. Thomas, Guelph, Ingersoll, Brantford, Woodstock, Cratham and other progressive cities and towns that have many miles of permanent walks laid and are still putting them down. They have abandoned wooden perishable sidewalks as a thing of the past. Now let us look at the sidewalks that are principally being laid in the city of London. Shoddy, the most expensive walks that can be built. The life of a wooden sidewalk is about six years, and half of this time constant repairing has to be done, replacing the rotten planks, paring down the knots, driving down the nails into the half-rotten seams, and so on. The city of London is up in front of citizens and sometimes throwing them down with the prospect of an action against the city for damages for being laid in the city of London. Shoddy, the most expensive walks that can be built. The life of a wooden sidewalk is about six years, and half of this time constant repairing has to be done, replacing the rotten planks, paring down the knots, driving down the nails into the half-rotten seams, and so on. The city of London is up in front of citizens and sometimes throwing them down with the prospect of an action against the city for damages for being laid in the city of London.

Shoddy, the most expensive walks that can be built. The life of a wooden sidewalk is about six years, and half of this time constant repairing has to be done, replacing the rotten planks, paring down the knots, driving down the nails into the half-rotten seams, and so on. The city of London is up in front of citizens and sometimes throwing them down with the prospect of an action against the city for damages for being laid in the city of London.
