EXPORT OF POWER UNDER DISCUSSION

Hears Arguments on Both Sides.

Question of Licensing Export of Power to Be Considered.

DECISION IS DEFERRED

No decision, it was intimated, was expected today The question of licensing the export of power will be considered by the government, Hon. E. L. Ottawa, Nov. 29.—The extent to which power developed at Niagura, should be licensed for export to the United States was argued before the minister of inland revenue today. The hearing was private, but the main lines of the argument were indicated. The three concerns affected arc the Canadian Niagura Co., the Electric Development Co., and the Ontario Fower Co. About 90 per cent. of the amount they generate goes across the line. The Hydro-Electric Commission of Ontario, which is growing, represents that it needs more power, and says that it is entitled to whatever it needs of the power developed on the Canadian side. On the other hand, the power companies urged that they were in the United States at rates higher than those the province was prepared to pay.

No decision, it was intimated, was expected today. The question of licenses ing the export of power will be considered by the government. Hon. E. L. Patenaude, minister of inland revenue, who department issues the licenses, is hearing the argument
