WERE PROMISES REALLY FULFILLED?

Carpet Company Manager
Replies to Critics Re-
garding Settlers.

Mrs. Jesse Hodson, secretary of the Women's Labor League of Ontario, stated in an interview with The Toronto World yesterday afternoon that a carpet manufacturing company in the city, which had a representative in British Columbia, had brought out women from both Asinister and Halifax to work as Asinister settlers and weavers and had promised them a wage of between \$20 and \$25 a week. The passage of the women had been paid to Canada, but many of the women when they arrived found no looms for them to work at, and the wages turned out to be twelve and fourteen dollars a week instead of the expected twenty or twenty-five dollars a week. Up to date the firm had brought out 32 women for this work. Mrs. Hodson stated that she had names, dates and facts all prepared for prosecution, and that the league was taking the matter up with vigor.

The general superintendent of the company in an interview with The World stated that Mrs. Hodson had only part of the facts, which were that only two fully skilled workers had been promised \$20 and \$25 a week, and that the others had been accepted as learners. These, it was true, were getting much less than \$20 a week, \$14 and \$15 to be correct. There were perhaps six of the thirty-three women sent over to Toronto from Asinister and Halifax, who were receiving the lower wages. These were the facts.
