expected, when we consider the number of defalcations which the year has brought to light.

The accident department yielded a profit of \$2,000 over losses and expenses of \$2,400.

A resume of the various branches of the Company's business, fire, accident, and guarantee, shows a very satisfactory year of \$5,120.15, which has been added to the reserve, no dividend being declared.

Their losses by the fire in the vicinity of Quebec, St. John, and St. Hyacinthe, aggregated \$84,302.

In the Department the receipts were \$43,880, and the losses and expenses \$28,972, showing a surplus of \$14,908.90; and the result of an investigation made by Hon. R. W. Wright at the desire of the Company, shows a surplus value in that branch of \$15,486.23 in favour of the Company.

The statement of the Company's affairs is presented with a clearness which is creditable, and might be advantageously copied by some other institutions.

The report was adopted, and the retiring directors re-elected. Sir Hugh Allan was subsequently elected president, and Mr. Adolphe Roy, vice-president of the Company.

The meeting of the Canada Fire and Marine Insurance Company was held in Hamilton on the 12th inst. The report presented was exceptionally full and clear, nothing being omitted which is necessary to arrive at a conclusion as to the condition of the company.

The Journal of Commerce, in speaking of the heavy losses sustained by insurance companies generally, says:—Hamilton has been named the 'Ambitious City,' not so far as the business of insurance—fire as well as life—is concerned, it certainly may be said to have some degree of reputation for its success in this respect.

Among Canadian fire insurance companies the position is held by the Canada Fire and Marine Insurance Company. The annual report, in our issue of the 10th ult., evinces managerial ability and a foresight which is not to be despised.

The latter shows the gross premium for the period ending 31st December last to have been \$1,172,800, exceeding that of the year 1876 by \$247,406, there remained in force at the end of the year the sum of \$6,823,977. The losses incurred during the year were \$400,000, or about 34 per cent of the total amount written of about 10 per cent of the total amount written of about 37 per cent.

During the sixteen months of its existence the Company has established and put in operation forty-eight re-insuring agencies and twenty sub-agencies, extending from Winnipeg to Halifax. This wide-spread business kept well in hand, and in charge of efficient officers and agents the amounts of agents' balances, \$10,769, is sufficient evidence, and the whole of that amount to learn had been received by the date of the annual meeting.

The sum received for interest on investments in land, being somewhat less than \$5,000, but this is owing to the large amount of cash retained on hand, a considerable portion of which the company have decided to invest in real estate in such securities as are permitted by their charter. The total income foots up \$1,742, an exhibit showing that the company must be congratulated upon, considering the brief period since its institution, the exceptional character of the times, and the lively competition which all new companies have to contend with.

The above Companies are represented by the Miramichi Insurance Agency, Chatham.

Correspondence.

We invite correspondents on all local subjects to send their communications to the Editor of the Miramichi Advance.

There were four cases entered for trial, viz:—1. W. J. Berton and S. D. Berton vs. James Mitchell—J. A. James for plaintiff.

2. George Robertson et al vs. John Leary—C. J. Sayre for plaintiff.

3. Albert T. Smith vs. Antoine Girouard—J. A. James for plaintiff.

4. Annie Harding vs. Matthew Glen-Hutchinson and Phiney for plaintiff.

The case was brought to justice for the price of a horse sold by one Albert T. Smith (the late firm Carman & Smith) to James Mitchell of Newcastle.

Plaintiff claimed ownership of the horse through a bill of sale given them by the said Albert T. Smith. This case occupied the Court the principal part of three days. The jury after being looked up for twenty-four hours failed to agree and were discharged.

Hutchinson and James for plaintiff; Sayre and Adams for defendant.

The fourth case on the docket—Harding vs. Glen—an action for breach of promise of marriage, was tried; and in this case, also, the jury disagreed. Hutchinson and Phiney for plaintiff; Sayre for defendant.

The jury presented His Honor Judge Wetmore with an appropriate address, and the Judge's first judicial visit to the County. His Honor made a suitable reply.

THE WEATHER.

One of the most severe snow storms of this season visited Richibucto and vicinity on Saturday and Sunday last. Snow fell to the depth of nearly two feet on an average, and the storm was accompanied with high wind and intense cold.

Roads in all directions are blocked up with snow, rendering travelling next to impossible.

PERSONAL.

Messrs. O'Leary and Johnson, the representatives for Kent, in the Local Parliament, have returned to their homes after their arduous legislative labors at Fredericton.

Messrs. Leary, Bell and others have a large staff of men at work making time preparatory to the summer's operations in putting up preserved lobsters and other fish. The total value of the manufactured article for 1877 will, it is estimated, be nearly \$200,000.

FIRE INSURANCE.

Judging from the following remarks, taken from two leading commercial papers of the Dominion, some of our Canadian Companies have been able to make money during the past year. Mr. Ira Cornwall, Jr., and his staff of agents, who represent these companies in this Province, were highly complimented by the directors for the large sum of money which they had contributed to those profits. The Montreal Times says:—

'The Citizens Insurance Company held their annual meeting on the 5th inst. The report of the directors, showing a business amount to \$244,362, which was announced to \$139,190 the year before. Against this heavy loss, including unadjusted and unpaid claims, stood up \$261,884.71, showing a deficit of over thirty thousand dollars. The guarantee department of the company's business shows a surplus of \$7,879.26, which is a better result than might have been expected, when we consider the number of defalcations which the year has brought to light.'

The accident department yielded a profit of \$2,000 over losses and expenses of \$2,400. A resume of the various branches of the Company's business, fire, accident, and guarantee, shows a very satisfactory year of \$5,120.15, which has been added to the reserve, no dividend being declared.

Their losses by the fire in the vicinity of Quebec, St. John, and St. Hyacinthe, aggregated \$84,302. In the Department the receipts were \$43,880, and the losses and expenses \$28,972, showing a surplus of \$14,908.90; and the result of an investigation made by Hon. R. W. Wright at the desire of the Company, shows a surplus value in that branch of \$15,486.23 in favour of the Company.

The statement of the Company's affairs is presented with a clearness which is creditable, and might be advantageously copied by some other institutions.
