At the Old Farmhouse

Malcolm Clair leaned back comfortably and looked idly from the car window at the swiftly passing green fields, dotted with bright splashes of color where the wild roses clustered.

The week before, Dr. Westall had told him in very plain terms that only absolute rest and quiet would save him from an enforced vacation of three or four years.

Malcolm Clair had arranged his business for an absence of several weeks, and he had taken a small village some 50 miles out, and slipped quietly from the town.

He felt even ludicrous as he wondered what he would do with himself in the country, and he had thought this was the place to pay for it, all right, I'll pay it, and call it cheap.

He walked across to the main street, that crossed along only a few rods distant. It consisted of a postoffice, a store that kept all lines of goods, and a small dwelling house.

Malcolm looked at the house and grounds with some curiosity when, after a five-mile drive, he drove into a driveway leading to a large, unpainted barn.

The young man looked at the card and then said: "Well, Mr. Clair, I've been waiting for you for some time, but under the weather, and the doctor has ordered a few weeks' rest."

Malcolm looked at the house and grounds with some curiosity when, after a five-mile drive, he drove into a driveway leading to a large, unpainted barn.

The young man looked at the card and then said: "Well, Mr. Clair, I've been waiting for you for some time, but under the weather, and the doctor has ordered a few weeks' rest."

About the House

White kid shoes, like white gloves, can be kept fresh by the use of gasoline.

MILITARY BUDDENS. France Bears the Heaviest and Rarest Lightest.

HINTS FOR THE HOUSEWIFE. White kid shoes, like white gloves, can be kept fresh by the use of gasoline.

WORK DOGS OF THE NORTH. Great Value of These Animals in This Cold Country.

The Klondike excitement caused a great demand for dogs capable of drawing sleds, and many dogs of the breed were taken there by prospectors.

Feathers can be cleaned by placing them in a tub of water, and then dipping them into a solution of soda.

WITH NUTS. Nutlets—One cup raw peanuts ground, one cup granola, one-half teaspoonful sage, one teaspoonful salt.

KEEF FEED COVERED. Many articles of food are great absorbers of gases, and should never be set away without being closely covered.

THE TOP OF THE PIANO. It seems to be the custom to arrange a miscellaneous collection of photographs and bric-a-brac on top of the piano.

Piles. To relieve you from the pain and itching of piles, use Dr. Chase's Ointment.

THE RETIRED BURGLAR. Draws a Lesson From His Own Experience. "No matter what business a man may be in, the retired burglar, it is only by actual hard work, and over and over again, that he will get on in it."

ON THE THRESHOLD OF WOMANHOOD. Many a Girl Falls a Victim of Ills Which Affect Health and Happiness All Through Life.—Dr. Chase's Nerve Food.

Just on the threshold of womanhood, that trying period when the whole system is undergoing a complete change, many a girl falls a victim of Chlorosis, or green sickness.

Examination shows a remarkable decrease in the quality of the blood. Iron and other restoratives are of little avail in such cases.

Dr. Chase's Nerve Food is woman's greatest help, because it forms new, rich, life-sustaining blood.

MADE USE OF ANTISEPTICS

Lord Lister's Contribution to Modern Surgery. Preventing the Poisoning that Often Resulted From Operations.

Lord Lister, while surgeon to the Glasgow Royal Infirmary, was deeply saddened by the large proportion of deaths due to the wounds after surgical operations.

At first he directed his efforts towards rendering the surroundings of the patients subservient to his views, and to combat the evil.

By 1867, after some years of patient investigation and experiment, he was able to announce to the world the method of the antiseptic treatment of wounds which had made his name famous.

As to exemption from military service, in Austria they amount to 21 per cent. in Germany 27 per cent. in Italy to 27 per cent.
