

been placed for 100 additional Cessna Aircraft from the Cessna Aircraft Company of Wichita, Kansas.

Overhaul and Repair Division

This Division supervises the operation of some twenty-nine plants from Halifax to Vancouver, and is responsible for the overhaul and repair of airframes, engines, propellers, and the assembly of English airframes.

Airframe Overhaul

Total number of airframes received at overhaul plants for overhaul and repair to date ..	451
Total airframes delivered	239
Total airframes on hand	197
Total salvaged	15

For the quarter ended September 30, 1941, the position of airframe overhaul and repair is as follows:-

Total airframes received	183
Total airframes delivered	130
Total on hand	197
Total salvaged	5

Airplane Engine Overhaul

Total engines received to date	1,594
Total engines delivered	1,192
Total engines on hand	384
Total engines salvaged	18

For the quarter ending September 30, 1941, the position of the repair and overhaul of airplane engines is as follows:-

Total engines received	661
Total engines delivered	558
Total engines on hand	384
Total engines salvaged	6

It is estimated that the total number of aircraft for which this Division has to provide facilities at the present time is approximately 5,000; a year from now, the total will be 10,000. The approximate annual dollar value of the work involved at present is \$22,000,000 at the present rate of overhaul costs, and a year hence it will be between \$50,000,000 to \$75,000,000.
