

Regulation 6

Reserve Ship Radiotelephone Station or Auxiliary Power Source

The Contracting Governments, each with respect to their own vessels, may require the fitting of a reserve radiotelephone station having an independent source of power, or an auxiliary power source for the main radiotelephone station.

Regulation 7

Coast Station Distress Watch

Each Contracting Government agrees to ensure that necessary arrangements are made for coast stations to maintain an effective continuous aural watch on the radiotelephone distress, safety and calling frequency or frequencies.
