## THIS IS THE MONEY-MAKING Harrow for Farmers

It cuts smooth, levels and covers the grain better than any other.

Perhaps slightly higher than some others in first cost but in the end much cheaper, because the teeth can be taken out and sharpened so much oftener than any other. They are left extra long for this purpose.

The teeth are held to the frame by a malleable clip and staple with nut in each end, thus the teeth can always be kept tight and at the right distance down to properly harrow the ground.

A Harrow may seem a simple thing, but we have put Hamilton Quality into ours, and it will pay you to have
