THE EXCELLENCE

HAY FORK

PETER GRANT, CLINTON

PATENTEE AND PROPRIETOR

THIS HAY FORK TAKES THE FIRST PRIZE WHEREVER EXHIBITED. It carried off the first Provincial Prize in 1869. It was not properly represented in 1870, but carried off the first prize at the Provincial Exhibition in 1871. If you want a fork get none but the best; the best is the cheapest. For Right, &c., &c., address P. GRANT, CLINTON. These forks may be seen and procured at the Agricultural Emporium, London. Price, with three Pulles, \$12.

FOR SALE,
THE RIGHT TO MANUFACTURE
THE
WALMSLEY POTATO DIGGER,
TOGETHER WITH DENNIS' IMPROVEMENT.

MY IMPROVEMENTS on this IMPLEMENT make it really EFFICIENT and VALUABLE, and without which it never was of much service.—References kindly permitted to, and particulars in regard to the operation and general efficiency of my Improvement obtained from W. WELD, at the "Canadian Agricultural Emporium," who has fully tested the Improvement.

CAUTION.—I hereby forbid any one using my Improvement on said Machine without my consent.
R. DENNIS.

CARTER & STEWART'S Ditching & Grading Machine

WE, THE UNDERSIGNED, HAVING BEEN PRESENT AT A TRIAL AND carefully examined the workings of the Machine recently invented by Mr. Henry Carter for the purpose of making Open Ditches, Grading Roads and Subsoiling, consider the said Machine admirably adapted for performing all the operations claimed by the inventor, and we feel justified in recommending this Machine to the Municipal Officers of every city, town, village and township in the country, satisfied that a very great saving will be made to the public by using the said Invention for improving the highways of the country. The Machine is exceedingly simple in construction, substantially put together, and not likely to get out of order. A man and heavy span of horses can handle it as readily as an ordinary plow. We also highly recommend this Invention to Farmers who contain the Open Ditching, Road Grading and Subsoiling; also to Railroad Contractors for Grading and Ditching:—

The King of Sewing Machines

THE OSBORN
LOCK STITCH
Sewing Machine

Has now been tested by a large number of the best judges of the kind, and the verdict of the public is that it is the most substantial, best, and the lowest working machine, and is the most beautiful in design and finish. Has the best design of a shuttle, and by far the largest bobbin. It is capable of performing a range of work without the slightest interruption. For Sewing Machines, is sold at about one-half the price of other machines doing the same work, and is equally at home on leather, as on the goods. A perfect machine guaranteed of no sale. It is the best made, simplest, most durable and reliable than any other single thread machine. Larger and would with greater ease than all other kinds of domestic sewing in a perfectly satisfactory manner. Has taken first prize wherever exhibited. Agents wanted everywhere. Special inducements.
