The Club Called Home.

I never have been black balled in the little club called Home.
I've never met a snob there with a

noddle full of toam, I've never had to vanish from th nuisances that crowd Around you in the clubhouse with

their talk and laughter loud. God bless the club house That we go to when we're home.
With its rest for hearts aweary,
With its warmth for those who
roam!

I never have been pestered by the thoughts of this or that,

The increase in the consumption The facrease in the consumption of opium in the United States is little less than appalling. Since 1860 the population has increased 133 per cent. while the consumption of all forms of opium has increased 351 per cent. Reliable authorities agree that oue-eighth of the amount of opium imported would suffice for all legitimate medical needs and that eighty per medical needs, and that eighty per cent, of the morphine used is to gra Leent. of the morphine used is to gra-tify the deadly craving, of which our modern civilization knows, all too much. The consumption of cocaine is equally as alarming. It is reliably estimated that 150,000 ounces of this degrading drug are used in illegiti-mate ways every year in the United States. The profits made in this usiness are enormous, hence the wil business are enormous, hence the wil-linguess of druggists and others to accompdate the unfortunate victim-of the opium and cocaine habit. On July 1st the Boylan law will come in-to operation in the state of New York, when opium, chloral and morphine and any derivatives and compounds when opium, then which includes obtained from them, which include eroin cannot be sold except on the escription of a regular licensed phyprescription of a regular liceased physician. A vigorous enforcement of this law will, it is believed, make it impossible for the wretches who now peddle drugs to school children to get their supplies. The public spirited people who brought about the passes of the property of the prope age of this law, will watch vigilenting age of this law, will watch vigitedly to see that its provisions are strictly enforced. Canada should also investigate the drug habit which is no doubt increasing in our midst, and legislate accordingly.

By "possible" is meant the actual results which have been obtained by our Experimental Ferms and by many farmers. These "possibles" have been obtained under intensive cultivation methods and conditions not altogether possible on the average farm, yet they suggest the great possibilities of increased production. By greater care in the selection of seed, more thorough cultivation, fertilization, better drainage, the average could be raised by at least one-third. That is itself would add at least, \$120,000,000
