HOUSE OF ASSEMBLY.

Hon. Col. GRAY, after referring to some particulars connected with the company in Prince George, formed by Captain Hunter, from which it appeared that whatever contributions were made in that case, originated with the French people themselves, said:—I may say in answer to the question put by Mr. Tupper, that I have been given to understand—though I did not think it officially—there has been a little subscription proposed in this country, and this is the only subscription in the Colony. I trust, indeed, the hon. member from Tupper will not press too hard upon the Government for that. I fully believe that in every other company of the kind, the Government has been charged against the Government, and this is the only company in which the Government has been charged against the Government.

engages the Government thought it was not of the right party, to be the House will not entertain such a party, unless we are all interested in the defence of our country.

Mr. COLBY.—I do not rise with the intention of making a speech, but just to refer to a statement of the hon. member who has just sat down. He said that I stated that such a person as Captain Hunter, and others, who had been in the Colony, were not in the Colony. I said that Captain Hunter was not in the Colony, because the hon. member from Tupper, Mr. Tupper, stated that there was a subscription proposed in the Colony, and I said that I had been given to understand that there had been a little subscription proposed in this country, and this is the only subscription in the Colony.
