A blossom on Life's immortal tree Floating, flowering evermore In the blessed light of the golden shore

The Apple as a Medicine.

The apple is such a common fruit that few persons are familiar with its remarkable efficacious medicinal properties. Everybody ought to know that the very Dodgers, best thing he can do is to eat apples just before going to bed. The apple is an excellent brain food, because it has more shape, than any other known fruit. It. excites the action of the liver, promotes sound and healthy sleep, and thoroughly disinfects the mouth. It also agglutinates the surplus acids of the stomach, helps the kidney secretion and prevents calculus growth, while it obviates indigestion and is one of the best preventatives of diseases of the throat. Next to lemon and orange, it is also the best antidote for the thirst and craving of persons ad-dicted to the alcohol and opium habits.
