(Boston News Bureau, Nov. 3.)

RECORD-BREAKING CONSUMPTION OF COPPER.

Anacosta's Fabricating Departments Produce Over 75,000,000 Pounds of Material in October.

Boston—If anyone needs proof that a record-breaking volume of copper is being absorbed by manufacturers the world over, it is had in the October operation of the American Brass Co. and the Great Falls wire mill owned by the Anacosta Co.

Last month these two departments of the Anacosta Co. far surpassed all previous production records in the output of fabricated material. They

produced in October over 75,000,000 pounds of brass and copper product, a volume 15% in excess of the highest month's output ever previously recorded.

"Some conception of the enormous volume of copper consumption is obtainable when it is realized that on the basis of October's operations American Brass and the Great Falls wire mill were producing at the rate of over 900,000,000 pounds per annum, and nothing approaching this volume was ever before reached in peace or war time."

The price of copper has advanced to 14 1/2 cents and a further increase in price it would seem cannot be much longer delayed, as the stock of available copper is dangerously small, less than three weeks' requirements for our domestic manufacturers and our export trade. Measured by the volume of the present demand and the poverty of available supplies the metal is fairly entitled to sell at 17 or 18 cents a pound.

There is nothing in sight to indicate any nearby recession in the demand, and the closing three months of 1925 will far surpass all previous records in the consumption of American copper.

### COPPER.

Less Competition in Foreign Market Would Help American Situation. Boston—A firmer tone has developed in the copper market. A slight upturn in price has been established with sales at 14 1/2 cents, delivered terms, for shipment over next two to three months.

The gradual absorption of surplus stocks has resulted in a more stable market. Heavy domestic consumption is running into the last quarter of the year. There is an extraordinary demand for manufactured products.

Better advices are anticipated from Europe if there is less intensified competition for international business. Greater activity for foreign account would very soon be reflected on this side. A revival of strong European buying would bring American buyers into the market with a rush.

N.Y.—Copper is up 1/4 cent on good demand. Trend of prices seems upward, as fabricators appear to have overstayed their market.

Electrolytic domestic is 14 1/2 to 14 3/4 cents a pound delivered to the end of January. European destinations are also up, with price of 14.85 to 14.90 cents c.i.f. Hamburg, Havre and London.

## Mongolian Gate to India Closed by Railway Line

RAILROAD CONSIDERED MISSING LINK IN CHAIN OF BRITISH PROTECTION.

LONDON, Nov. 2.—The flood gate of Mongolia through which India has been propped shut, perhaps permanently closed, by a railroad which will begin regular operation Monday.

The railroad runs through Khyber Pass which pierces the Himalaya Mountains for a distance of 30 miles in a gorge which rarely is more than 150 yards wide and which narrows to about 10 feet at one point.

The railroad is only 28 1-2 miles long, but five years of tremendous effort and \$10,000,000 have been required to complete it. It links the northwest frontier of British India with the Afghanistan plains and passes through the Afridi Pathan country among the peaks.

The tremendous military significance of the railroad may be estimated by the fact that the British consider it to provide the missing link in the chain of British protection for India's 320,000,000 inhabitants.

Sir Chas. Innes, a member of the Council of India, will preside at the inaugural ceremonies at Jamrud, the British fort on the frontier.

From the days of Alexander the Great, the Khyber Pass has let military machines and unorganized hordes into the rich Provinces of Hindustan, where they have looted, murdered and destroyed. In 1903, marauders swarmed through the pass and conquered all the states between the Indus and the lower Ganges, returning to Mongolia with fabulous wealth.

These mighty movements have degenerated into murderous raids. Through the pass now the Pathans come for sudden descent upon native and sometimes Brit's homes. Then they scramble up the pass to safety.

With the new road it will be impossible for the marauders to escape punishment merely because of lack of proper transport, which hitherto has permitted most of them to get off.

The safety of British troops and the population of India demand extreme precautions along the northwest frontier, and they have been taken. The stations along the right-of-way are little forts. Steel shutters enclose them and the steel is pierced to permit the use of machine guns. Blockhouses guard the approaches to vital points, such as bridges between the fortress-stations.

With the civilizing influence of a railroad, the British hope to win the Pathans to comparative peace, but not without a struggle. Military men foresee misadventures. Sometimes the railway will be broken by floods and sometimes by the Pathans, for no matter what are the methods used against them, the Pathans periodically will display their passion for loot by swift raids.

## Appeals to Privy Council

LONDON, Eng., Nov. 4.—Canadian Press)—That India is far the most litigious of all the Dominions, so far as carrying appeals to "the foot of the Throne" is concerned, is proven by the figures of appeals before the Judicial Committee during last year.

There were 257 appeals from India against 92 from all other Dominion and Colonial Courts. Of these 32 there were 10 from the Canadian Supreme Court, seven from Ontario Supreme Court, two from New Brunswick, three from Quebec, two from Saskatchewan, and one from each provincial supreme courts.

Canada therefore is a poor second to India—and is likely to be even more so after this year, when the new Rules granting leave to appeal come into force. But even so she is well ahead of the rest of the Empire. The Gold Coast sent six appeals to London, Ceylon eight, New South Wales five, New Zealand three. The rest "also ran" with but one appeal each.

## Personals

Mr. J. R. Johnston, Real Estate Agent, is a first-class passenger by S.S. Silvia which sails to-day. He intends to spend the winter months in Miami, Florida. We wish him a bon voyage and a pleasant trip. His many friends will be sorry to hear of his departure.

KEY AWAITS OWNER.—A key, picked up by the watchman at the entrance to the Dry Dock, awaits an owner at this office.

## Mental Wizard Reveals Many Secrets

PROFESSOR MEM-O-REA WORKS WONDERS.

Professor Mem-O-REA, the world's famous mind reader, again attracted a large audience at the Majestic Theatre last night. Whilst Mem-O-REA is his stage name, Professor Gladstone is a member of the Psychological Research Society and has been before the public for forty years, principally in Europe. He has won the confidence of the St. John's audience by his marvellous revelations. Those of his audience who had their minds read, are satisfied that MEM-O-REA is thorough in his thought transference study. True, some of the answers are slow and canny but answer the purpose correctly to the subject to whom he is revealing. Already there is more than sufficient testimony to substantiate his assertion that it is by scientific means alone, that he reveals. Next week, he will enter upon the second week of his unlimited engagement, and he it said that now that interest has been aroused to a high pitch, there will be many who will avail of the opportunity to interview him.

Miss Rita Johnson, the international dancer, will be seen in new dances. The statement that is generally given by the people who have already seen her "That she is the best to visit St. John's," is in every sense of the word correct.

The feature for Monday is "Love's Bargain," starring the lovable Marjorie Daw. There will be only one show on Monday commencing at 8 o'clock. The usual admission fee of 30c. for Monday's show. Professor MEM-O-REA will take the stage immediately after the feature picture.

## Signalman's Surprise Advice

Editor Evening Telegram.  
Dear Sir—The suggestion made by "Signalman" in the Daily News that a hot rum and lemon is effective medicine in the case of a cold for all but prohibitionists is mighty good advice from a mighty surprising source. Is the author not afraid that he may even tempt the latter to test it, on the ground that what is sauce for the goose is sauce for the gander? An onion is but a sorry substitute, and "Have an onion" does not sound half as inviting an offer as "Have a drink."

Yours truly,  
SNEEZE.

some agency which conducts them on a tour to our metropolises. There they find life crowded and easy-going, they see laughing countenances and the shops filled to overflowing with luxuries. They are taken to "see Paris by night" and friendly guides explain to them that the French are perpetually "en fete" whereas, if it were not for the Americans, practically every night establishment would be obliged to close their doors. So when the barber from Idaho and the little store-keeper from Utah return home with their families, it is to carry this abundant France, which no longer suffers in the least from the war, where liberty approaches to license, and where everything is dirt cheap, signifying to their intelligence that the inhabitants must pay only the very lightest of taxes.

## S.E. Gale on West Coast

CARIBOU DELAYED IN SAILING.

A message from the operator at Port aux Basques to the Nfld. Govt. Railway, was received this morning, stating that a heavy S.E. gale raged there all night, and did not abate until early morning. Similar conditions prevailed in the Cabot Strait, and as a result the Caribou which was scheduled to sail for North Sydney at 7 o'clock last night, did not get away until the same hour this morning. The Caribou has fifty-one passengers on board. It is raining all along the railway to-day.

Canadian debt, during the years of prosperity which permitted the successful debt reduction in the United States, it is pointed out. "We find ourselves, seven years after the end of the war, with a national debt of two and a half billion dollars. The load of national, provincial and local taxation has continued to grow until we are now faced by the necessity of a national policy of retrenchment."

The letter continues: "So long as each part of the country interested itself only in savings which might be effected in some other district, no great economies could be secured, but now the necessity for government economy has become a matter of such outstanding importance that a balanced budget must cease to be a party issue, and the time is ripe for all Canadians to unite in a decisive effort to reduce expenditure. Agriculture, industry and commerce have experienced prolonged, costly and discouraging depression, and are not ready for a season of recovery. It is exceedingly important that this recovery should be given the added stimulus which comes from reduced taxation."

## Promoter Will Sue Jack Dempsey

MEXICO CITY, Nov. 5.—Newspaper despatches from Tampico say local boxing promoters are much exercised over the failure of Jack Dempsey to appear at exhibitions there in accordance with a contract. They allege the champion returned a ten thousand peso cheque given him as a retaining fee, and left Tampico without explanation. The despatches say the promoters will sue Dempsey for damages in the United States courts.
