## JOURNEY TO THE SHORES

cumstances which had an influence on our progress in the ensuing summer. The observations on the magnetic needle, the temperature of the atmosphere, the Aurora Borealis, and other meteorological phenomena, together with the mineralogical and botanical notices, being less interesting to the general reader, are omitted in this edition.

The men continued to work diligently at the house, and by the 30th of September had nearly completed it for our reception, when a heavy fall of rain washed the greater part of the mud off the roof. This rain was remarked by the Indians as unusual, after what they had deemed so decided a commencement of winter in the early part of the month. The mean temperature for the month was  $33\frac{3}{4}^{\circ}$ , but the thermometer had sunk as low as 16°, and on one occasion rose to 53°.

Besides the party constantly employed at the house, two men were appointed to fish, and others were occasionally sent for meat, as the hunters procured it. This latter employment, although extremely laborious, was always relished by the Canadians, as they never failed to use a prescriptive right of helping themselves to the fattest and most delicate parts of the deer. Towards the end of the month, the rein-deer began to quit the barren grounds, and came into the vicinity of the
