

Saves the Cost of Poles and Power

The No. 24 Fairbanks-Morse Gasoline Motor Car shown here is a self-contained power plant, as easily controlled as an electric car, and far more economical. It is designed for passenger service and has a seating capacity for 35 people. The body is divided into two compartments, the rear having reversible seats upholstered in rattan, and the forward compartment containing engine and having ample room for light baggage and express, or can be used as a smoking compartment, as it is arranged with side drop seats.

FAIRBANKS-MORSE GASOLINE MOTOR CARS

Are very economical and efficient equipment for branch lines, feeders, etc. They are now in successful operation on many parts of the Continent. The cars we have in use in Winnipeg are giving splendid satisfaction.

In sparsely settled districts, or for connecting adjacent towns, the gasoline motor car is the most logical solution of efficient and satisfactory service. Not only is the first cost of the equipment low, but these cars will

operate on a fraction of the expense of the steam train. As compared to the electric line they require no poles, wiring, power house, or other expense except when actually running.

These cars are regularly equipped with air brake and hot water heating system. Maximum speed about 30 miles per hour.

The CANADIAN FAIRBANKS-MORSE COMPANY Limited

444 St. James St., Montreal

Your Police Force Could Handle Any Riot if —

it had the aid of an efficient, modern signal system.

¶ Crowds very quickly become excited. The arrival of two or three policemen before the excitement becomes heated will often disperse a crowd that later on could not be handled by one hundred men.

¶ By means of an efficient signal system, headquarters can keep in touch with the movements of every man on the

force, and every man on the force can keep constantly in touch with headquarters.

¶ A small police force with the aid of proper signal equipment can do more effective work than a much larger force working without the aid of a signal system.

¶ No village is too small for an efficient police signal system.
