## PRATT & WHITNEY RECEIVES ANOTHER AIRCRAFT ENGINE ORDER

JAKARTA, INDONESIA--During the visit of James Kelleher, Minister for International Trade, it was announced that Pratt & Whitney Canada has received a further order valued at approximately \$10 million for its PT6T-3B twinned turbo-shaft engines.

The "Twin Pac" unit is being used in the Bell 412 helicopter which is being assembled by PT Nurtanio - the Indonesian aircraft manufacturer.

Pratt & Whitney won a similar contract last year for the sale to PT Nurtanio of 13 engines valued at approximately \$10 million. Financing for the 1985 contract was provided by the Canadian Government's Export Development Corporation.

One hundred helicopters are planned in the co-production program. Subsequent repeat engine orders will be negotiated on an annual basis.
