Tons of Coal for the Various Ports This Season.

Detroit, Mich., July 29.-Vessels trading in the Georgian Bay district are doing a volume of business that is surprising to those who have observed it. It is believed 300,000 tons of coal will have been delivered at Georgian Bay ports by the time navigation closes. The traffic is carried on between Lake Erie ports and Midland, Collingwood, Owen Sound, Wiarton, Meaford, Depot Harbor, Parry Sound and Victoria. The development of the cement industry and new manufactures has created a market for much coal. Most of this is being moved by transient carriers. The going rate from Lake Erie to the Georgian Bay is

### WILL AGITATE FOR HOME RULE

mined. Says Leader John Redmond.

London, July 29.—"The wave of disappointment and depression which spread over Ireland on the breakdown of Mr. Birrell's bill on Irish it was a ghastly irony to read today government has spent its force and the words of the address presented to is subsiding rapidly," says John E. King Leopold by the city of London Redmond.

"On the whole, I believe what has occurred is good for home rule. If clared the British Government should the council's bill had passed the be reminded of the sense of respon-House of Commons, most unquestion- sibility of all Englishmen in this ably it would have been rejected by the House of Lords, and it would then have passed into the programme adian composite teams of field of the Liberal party as its Irish policy. That, and that alone, would have been the Irish policy submitted to the electors at the next general and failing that, the appointment of election, and home rule would have more British consuls in the Upper been still further from the purview Congo. of the near future.

"Now. no such misfortune can occur. No policy of evolution or half measures can or will be part of the Liberal programme or be submitted to the electors at the next elections. That policy is dead and buried.

Home Rule or Coercion. "The Irish policy of the Liberal party must be home rule or coercion. and inasmuch as the overwhelming majority of the present Liberal party and the entire cabinet, except five men, is made up of those who be-Asociation now provide al- lieve in Mr. Gladstone's policy, I have ything that n. c. o.'s and men little doubt that the next time the electors are appealed to home rule for Ireland will be a foremost and an openly avowed portion of the Liberal programme.

"Let it be remembered that the ter for drinking and bathing time for that appeal is not far diss supplied from springs. tant. The resolution adopted by the withdrew his motion. House of Commons by a majority of ras the capacity of the sys- 285 calling for the practical abolition this year 140,000 gallons of the veto of the House of Lords be pumped. The maximum will be followed next year by a bill nours was 50,000 gallons; to carry it into effect. That bill Motion to Call Convention to Unite All hot day last week. The will be passed by the lower House ant is 30,000 gallons a by enormous majorities, and will be antity of water kept on rejected sans phrase by the House of

### Beginning of the End.

"In an autumn session next year, in all probability, it will be again passed by the House of Commons and monde, who resigned as member of again rejected by the peers. That will be the beginning of the end, and division of Wexford, and Charles it is not taking much risk to prohave accommodation for phesy that January, 1909, will wit-All buildings and roadways ness a general election on the question of the House of Lords.

"Should the Liberals return with a substantial, even though largely reduced, majority (for it must be remembered that majority (for it must be remembered that their present majority is in the nature of a freak), then most undoubtedly we will be on the eve of such a modification of the constitution as will make the will of the representative assembly supreme and enable home rule for Ireland and a score

of other measures to be enacted.

"Meantime in Ireland the people are girding up their loins for a period of tenewed and vigorous agitation.

"This winter will see a home rule propaganda carried in both Ireland and Great a real age that which Britain on as great a scale as that which marked the intervals between the two home rule bills of 1886 and 1893.

home rule bills of 1886 and 1895.

"Here and there we hear the voice of discontent and of dissension. When has Ireland, or, for the matter of that, any country, been free from it? William O'Brien still remains at arm's length from his old colleagues and friends, and refuses to re-enter the ranks of a pledge-bound

"A few young men, most of them quite sincere, are calling for the withdrawal of the National party from the House of Commons, because with the impatience of youth they chafe at the delays and disappointments, and entirely overlook the enormous and steady advances and concessions of the past twenty-five years.

"But speaking of Ireland as a whole, the people, lay and clerical, are united and hopeful and determined. They believe in the old policy of Parnell—a strong agitation at home, a pledge-bound and independent party in Parliament—and they have learned in bitter experience that the one calamity greater than any other conceivable is serious disunion in the National ranks. Everyone concerned may take it from me that there is and there will be no such calamity.

"The collapse of the recent bill was but apse of the recent bill was but cloud, and all goes well with

Lord Monkswell Introduces Motion to Have Great Britain Investigate.

London, July 29.—"The system of government in the Congo Independent State is one of unrestrained tyranny enforced by the lash and the bullet,

by cruelty and by murder." These words were spoken by Lord Monkswell, who raised the Congo question in the House of Lords today and moved for the papers.

The attendance in the House was

Lord Monkswell said that the Congo government was a powerful engine of greed, which impudently and insolently violated the limitation and restrictions under which its rights over the territory had been granted. The speaker quoted authorities to support his statement and added that an especial responsibility attached to Great Britain because, except for her determined action, the King of Portugal, and not the King of the Belgians, would at this moment have been the ruler of the Congo.

The Archbishop of Canterbury declared that the Congo was one of the most disheartening and humiliating of contemporary questions. He said in 1884, congratulating his majesty upon his "bloodless victory." He dematter.

A general debate on the Congo question followed and a number of bishops were among the speakers. The Earl of Mayou advocated another international convention in the matter of the Congo

Lord Fitzmaurice, under secretary of foreign affairs, speaking for the Government, said they were not blind to the fact that this matter was

surrounded with grave difficulties. The Government has asked the Congo State, he said, not to disregard the experience of previous governments of native states and had instanced the early history of British East India.

The present system, the speaker said, was certain to have evil consequences. Lord Fitzmaurice admitted that the House of Lords had a right to ask what progress had been made but he said it was an international question, and if the House took any sudden, rash action, it would run the risk of injuring the cause it had at

At the conclusion of Lord Fitzmaurice's address Lord Monkswell

### THE NATIONALIST SPLIT

Sections Voted Down.

London, July 29.—The recent split in the Nationalist party caused by the repudiation of the policy of the party by Sir Thomas Henry Grattan Esthe House of Commons for the north Joseph Dolan, member from Leltrim, was considered at a special meeting of the Nationalists held in the committee room of the House of Commons under the presidency of John E. Redmond. Resolutions were adopted calling upon Mr. Dolan to resign and expressing satisfaction that Sir Thomas had already taken steps to vacate in favor of Mr. Donnell. Mr. Dolan's action in joining the Sinn Fein Society was recently condemned Cairo. by the executive committee of the

Trish League James Gilhooly, member for the west division of Cork, protested measures against patriotic colleagues" a Nationalist convention with a 'view to composing the differences that are tending to create despair among patriotic Irishmen." This amendment was rejected by 59 votes

A resolution of sympathy for Edward Blake was adopted.

### AWFUL FIGHT WITH PYTHON

South African Hunter Is Hunted By Snake.

Mahalapye, Bechuanaland, South Africa, July 29.—One of a party of hunters in this district shot a wild fowl and hurried across the veld to pick it up, when he stumbled over something and fell on top of a huge phyton hidden in the grass. Instantly the reptile

coiled itself about him, pinning the left arm, with the gun, to the man's side. Trying to lessen the fearful pressure, the man gripped the python's throat with his free hand and shouted to his companions, who had scattered, for help. They were too far away to hear, and the python began to work visiting at the house of any one not a planned to coil its tail, thus gaining a purchase which would have enabled it

The hunter struggled frantically reach his claspknife, but the coils Dean. were too tight and his breath was leaving him. A moment more and he His father was a penniless clerk in knew he must succumb. By a supreme effort he managed to pull the trigger of his gun, pinned close to his side, without knowing whether the charge would enter his own body or the python's. Luckily the shot struck the in charge of it. reptile in the back and the huge folds

elaxed for an instant. The hunter staggered to his feet but the snake seized him again, this time by the sleeve. He was slowly being other hunters arrived and rescued

## THE LARDER LAKE EXPLORATION & DEVELOPMEN

CAPITAL, 500,000 SHARES-PAR VALUE \$1.00 PER SHARE

FULLY PAID AND NON-ASSESSABLE. First Allotment of 50,000 Shares at Fifteen Cents Per Share. Our Option on this small block of Underwriters' Stock expires Aug. 3, 1907. Subscriptions postmarked at later date will be returned.

Do you realize that investments of a hundred or a thousand will grow rapidly into hundreds and thousands and millions of dollars? The over-conservative and skeptical will smile—they will laugh at these predictions, some will even consider this a joke—but remember COBALT, if you please, two or three years ago? Then it was a "vision," it was a "dream," "a flash in the pan," "a bubble," somebody was "crazy," but now it is different. Those crazy men are now classed among the smartest and keenest business men of the day. The actual value of a few mines are worth at the present date more than one hundred millions of dollars. These are facts.

for subscription we appeal to the good judgment of sensible persons as to its merit.

It embodies, we believe a correct method for developing and establishing successful and paying mining enterprises.

We desire to conduct, first of all, a successful Mine Development. We intend this to be done in a way that will be absolutely fair and honest, and bring the largest profit possible to those who co-operate with us.

We, therefore, desire this proposition to be well understood by investors. We wish it to be known just how we propose to develop, establish and operate dividendpaying Mining Companies by and through this investment.

THE PLAN.—The plan involved in this proposition is that of uniting or consolidating the investments of a limited number of persons into one sum, and under one management, to be used in acquiring and developing Mining properties in this wonderful region.

THE PRINCIPLE involved in this investment we believe is one of absolute fairness to all interested. The "promotion interest" common to all mining companies, and which is the great unfair feature to investors who put their money into stocks of these companies, and whose money develops and makes the mine, if a mine is developeddoes not exist in this proposition. There is no "promotion interest" set aside, and against the interest bought and paid for by the investors.

In this proposition the investors, and all the investors, became promoters. They take the "promotion interest" and all the interest. They own the whole enterprise. No matter how large or small the investment-all stand on an equal basis. Our field of operation is probably one of the greatest, and without doubt the richest, mineralized region in the world.

For its basis, upon which we will establish and build up several great producing, paying mining companies, we will exploit and de-

Don't wait! Be wise! Act NOW!

NOW IS THE TIME! Here is an op-

portunity that excels that which you

had two or three years ago at Co-balt. Perhaps you will say as you did

In presenting this investment | velop in a mining-like and careful | belt, extending from the Montreal | manner extensive mining propertles now known to us, and other properties which we may acquire for the mutual benefit of all in-

vestors in this Company. SUBSIDIARY COMPANIES -The Larder Lake Exploration and Development Company will incorporate a series, not to exceed five, of Subsidiary Mining Companies upon only the real proven properties acquired.

In each and every Subsidiary Company incorporated, whether Mining, Milling, Smelting, Water Power, or Electric Light, the Exploration Company will take 90 per cent of the capital stock of each Company so incorporated, and will put 10 per cent of the capital stock of each Company in its treasury. It will probably never become necessary to sell any of this Treasury Stock.

Out of the total Capital Stock of each Subsidiary Company, the Exploration Company will retain 50 per cent as its "Holding Stock." This will always control the Company. It will take and hold 40 per cent for the mutual benefit of all stockholders in the Exploration Company. This 40 per cent will be known as "Selling Stock," and as a market is created it will be sold, and the proceeds received will be distributed pro rata to the stockholders in the Exploration Company, as their interests may ap-

The stock of the Subsidiary Companies will be listed on the New York Curb and Mining Exchanges of the country, and started at 50 cents a share, where it can be bought and sold according to the daily market quotations. This will afford a channel by which stockholders can sell the 40 per cent. "Selling Stock" from time to time, if they wish.

PROPERTIES-Many different mining properties will be acquired and developed as stock in the Exploration Company is subscribed for. All properties will be described, and reports submitted regarding same, as soon and as often as they can be examined by the engineers. The mining properties that will

be acquired for this proposition will be located in the gold and silver money into over-capitalized mining

River through Northern Ontario, eastward into Quebec, and will include properties in the Lady Evelyn District, the new Montreal River Silver District, Cobalt District, and the gold districts around Round Lake, Larder Lake, Lake Abitibi, and in the great undeveloped mineralized section of Quebec lying just east of Larder Lake and extending northward to Lake Abi-

We shall try and make every dollar count, and make as few mistakes as possible. We hope to create such an interest in this enterprise with investors, that will result in extensive and widespread co-operation.

Under this plan no one can truthfully say that it is not a great mining investment. We want every investor to feel a personal interest in this mine development. The investors in this company will own this enterprise, and we want them to co-operate with us and our associates to make it a great success.

We are now organizing The Larder Lake Exploration and Development Company with what we consider sufficient capital (\$500,-000), We now have options on, and propose to acquire five distinct and separate properties which will be incorporated at \$100,000 each (100,000 shares-par value \$1 00). The Exploration Company will at all times hold a controlling interest in each of these companies, so that 60 per cent of the dividends earned and declared will be paid into the treasury of the parent company, and the other 40 per cent distributed among the stockholders on record. This in our opinion will enable us to pay dividends and large ones in the very near future.

The board of directors of The Larder Lake Exploration and Development Company will be composed only of engineers of national repute, setting a precedent in this line-Mr. Robert Morton will be president, which fact in itself guarantees conservative and able management.

Investors have been pouring their

companies, they have been plunging about wildly in the hope of some day "striking it rich" never stopping to think for one instant that the greater part of their money never reaches the ground, as a rule 75 per cent of the money invested in stock schemes goes into the broker's hands. He pays his salesmen 20 to 50 per cent on every dollar turned in, he must get his own commission and engineers must be

We never have had associated with us a stock salesman, we require no commission and our engineers will be our directors, so that every dollar invested with us on this proposition will be honestly used in the purchasing and developing of the different properties.

We are now offering for subscription the first allotment of stock in The Larder Lake Exploration and Development Companyevery one hundred shares entitles the holder to forty shares of stock in each of the subsidiary companies to be incorporated, making in all 200 shares of stock in five separate companies, which, as soon as development work is started and dividends announced, will make the stock of the Larder Lake Exploration and Development Company almost invaluable. This first allotment of only 50,000 shares (\$1 00 par value) will probably be largely oversubscribed in a few days.

The next allotment will be put out Sept. 25, 1907, at 75c per share or higher.

This price (15c) will positively be withdrawn August 3, 1907. If this allotment is over-subscribed remittances will be promptly returned. Checks, drafts and money orders must accompany all applications and be made payable to the financial agents.

Interim certificates will be promptly returned to subscribers. The stock certificates of the company representing the shares purchased will be issued and delivered as soon as allotment can be made after August 3, to all subscribers who purchase at the first underwriting price prior to that

Are you going to get in now, in

time, at Larder Lake? You can now
