SAYS OCEAN LINERS WILL DOCK AT PORT WITHIN FIVE YEARS

Company Which Has Dominion Charter Plans Huge Expenditures.

Important developments in connection with projects planned by the Great Lakes and Atlantic Canal and Power Company, which has secured a Dominion charter, are expected shortly and if completed will materially affect not only London but the district. Preliminary surveys by the company's engineers are now in progress, it was stated to The Advertiser today, and the company's plans call for an expenditure of more than half a billion dollars.

Within five years, you will see ocean liners coming up to Toronto, and from there to Port Stanley on Lake Erie, said J. N. Cantin of St. Joseph, Ont., to The Telegram today. "The plans provide for a canal 35 feet deep and 400 feet wide to be built from a point close to Port Talbot on Lake Erie to Port Frank on Lake Huron. This distance is approximately 45 nautical miles, and by sending steamers this way at least 350 miles can be saved over the Lake St. Clair and Detroit River route. We plan to have only one lock between Lake Erie and Lake Huron. This is made possible because the difference in the levels of

Lake Erie and Lake Huron is only nine feet. We estimate that this section of the project will cost fifty million dollars. Its construction will result in a saving of at least 20 per cent over present transportation costs to say nothing of time. This, in view of steadily increasing freight rates, means millions of dollars to shippers every year, especially to Toronto firms."

Mr. Cantin states that the company has secured its charter, and is ready to proceed at any time. The only thing preventing work starting at once is reports that are pending from the international waterways commission. "From Lake Erie to Lake Ontario," he said, "a cut will be made perfectly straight from Jordan Harbor on Lake Ontario to Moulton Bay on Lake Erie, a distance of not quite nineteen nautical miles. The fall between the lakes is 325 feet, and would necessitate six locks. We plan also to deepen the Straits of Mackinac and the Saint Ste. Marie ship channel, making ocean terminals of Chicago, Indiana Harbor, Gary, Milwaukee, Duluth and Port William and seaports of Detroit, Windsor, Toronto, Buffalo, Hamilton, Charlotte, N. Y., and Valleyfield, Quebec.

Mr. Cantin states that the company is ready to expend \$200,000,000 additional in developing electrical power. Lake Huron, he declared, is the greatest marine connecting link in the world even though navigation is only open the great lakes for an average of 220 days each year. Actual figures, he said, show that a vessel passes every fourteen minutes, and that the value of commodities carried exceeds one and a half billions annually. The country forming the boundary of Lake Huron to a depth inland of 270 miles, he claims produces annually more food, material and commodities actually convertible into cash than any other area five times its size. The proposed Lake Erie to Lake Huron Canal, Mr. Cantin said, would take the route of Lake Ontario at a point approximately 15 miles distant.

ALL READY FOR FAIR OPENING

Exhibition This Year Promises To Smash All Previous Records.

Queen's Park throbbed with activity today, hundreds of workmen and exhibitors having commenced the annual task of preparation for the opening of the Western Fair. All exhibitors have been located and displays are being whipped into shape throughout the grounds and in every building. Tents are being erected by concessionaires and outside exhibitors, while live stock and cattle buildings are being rapidly put up. Today fourteen carloads of live stock arrived from distant points, while farmers from the district are bringing others hourly. The first of the speed horses have also reached the barns, and indications, according to Secretary A. M. Hunt, are that there will be an exceptionally heavy quality entry.

Chicago booking offices telegraphed that all artists for the grandstand performances will be on hand for their first program Monday afternoon, while the advance guard of the Johnny J. Jones midway shows is already on the scene. Two trainloads of more than forty cars will bring the midway shows to the fair grounds on Sunday afternoon. All exhibits and every attraction will be ready for children's day on Monday. The "kiddies" will have a genuine bargain day, being given the full bill of the week, but 5-cent admission charges will be in effect on gates and stands and along the midway.

The coin-operated turnstiles ordered some months ago were delayed in delivery. The gates will be manned for the first time tomorrow. Today caretakers were placed on duty in all buildings and they will continue on guard day and night until the close of the Fair.

Half-Dollar Fess. The half-dollar problem is one that the officers of the Fair are giving attention. Saturday and Monday the admission for adults will be 25 cents, but during the remainder of the exhibition the rate will be 50 cents. On the heavy days it is probable that 40,000 to 50,000 people will pass through the turnstiles, and a tremendous "tonnage" of coins will be required to keep them moving. Change booths will be maintained at the gates, but the directors urge visitors to come with their own coins, if possible, in order to facilitate handling the crowds.

The Playgrounds Association will furnish three supervisors every day during the exhibition. They will look after the needs of the youngsters, and will devote special attention to restoring to their parents any of the "kiddies" who may be separated from their friends on the grounds.

Sending German Guns. The public utilities department will transfer a number of the captured German guns to the exhibition grounds for the inspection of Fair visitors. Representatives of the Fair directors who proceeded to Toronto to accept entries in different departments were delighted to pick up the National exhibition. Today all space is gone, and Secretary Hunt has been compelled to turn away large numbers of intending exhibitors.

The poultry show will break all records with a display of 2,051 birds. The dog show, which opens on Tuesday, will also be a notable event, while the motor show, pure foot show, art exhibition, and other special features, will also achieve notable standards.

COPS WATCHED GAME OF AFRICAN GOLF ON SUNDAY MORNING

John Anderson and His Pals Were Fined As Result.

Charged with keeping a gaming house, John Anderson, colored, of 103 Glenwood avenue, pleaded guilty in police court today and was fined \$10 and costs or ten days. James O'Rourke, Samuel Harris, George Chantler, Harry Fountain and George Fountain pleaded guilty of being frequenters, and were assessed \$2 and costs. Patrol Sergt. William McCullough stated that at 1 o'clock on Sunday morning he watched through the window of John Anderson's house and saw the men playing golf. He swore that Anderson had a little mug in which he placed the rake-off from each game, which he turned to the municipal sum of 5 cents. Anderson first pleaded not guilty, as he understood the charge that was laid against him was that of being a frequenter. When it was explained this was not the case he changed his plea. According to Patrol Sergt. McCullough and Constable George A. Tomlin, they made their entrance to the house through the front door. Anderson claimed they broke in. There was a hole in the door to prove it. "You say you did not break in, ma house; you say that in front of whole court. You ought to be ashamed of yourself," said Anderson. In the raid the crap-shooters attempted to make a getaway, but were rounded up by the constables. A quantity of money and the dice which was scattered around the room when the constables made an appearance, was collected along with "seven come eleven" boys.
