

mistake—they are all buried, you cannot tell anything about them I do not put any straw on top of the tile, I put the tile close together. I generally lay the tile from two and a half to three feet deep. Some of them are put in four feet, where our subsoil is heaviest we put tile in every two rods.

VOTE OF THANKS TO MR. TERRY.

Moved by Dr. MILLS, seconded by R. F. HOLTERMANN, that the members of the Experimental Union and others present return their sincere thanks to Mr. Terry for the very excellent addresses with which he has favored them; that they express their high estimate of Mr. Terry's ability, and their appreciation of the great services which he has rendered to the cause of agriculture on this continent. They have been greatly pleased with the simple, direct, and eminently practical character of Mr. Terry's addresses; and they beg him to accept this very inadequate expression of their appreciation. Carried.

TREASURER'S REPORT.

AUDITORS' REPORT.

We, the undersigned auditors of the Ontario Agricultural and Experimental Union, beg leave to say that we have examined the accounts of the Treasurer and find them to be correct.

(Signed) { L. W. LANG,
T. F. PATTERSON.

After considering the requirements of the different committees on experiments for 1895, Messrs. Holtermann and Lick were appointed a committee to wait upon the Honorable Minister of Agriculture, with the object of having the Government grant increased to \$1,000 during the coming year. The Union was grateful to the Government for the grants received in the past, but believes that the value of the results of the co-operative experiments are worth many times their cost to the farmers of Ontario. The committees on agricultural, horticultural and apicultural co-operative experiments could all extend their work over Ontario to great advantage with the grant increased to \$1,000, but the work cannot be extended much beyond its present scope unless the grant to the Union be increased for 1895. A new committee on live stock Experiments has been appointed at this meeting, and if this committee carries on any co-operative experimental work, some money will also be required for this.

After a vote of thanks to the retiring officers had been passed, the sixteenth annual meeting of the Agricultural and Experimental Union was brought to a close at about 5 p.m.
