

DON'T TAKE DRUGS

"Throw physic to the dogs," said Shakespeare long ago. "Feed it to the fishes," say the foremost doctors of today.

Dr. Willia Oster, of "chloroform" fame, says: "I believe that the best doctor is the one who knows the worthlessness of medicines."

Dr. Alfred Lettingwell, of the American Humane Association, says: "I do not believe that the average length of human life would be diminished by an hour if all the drugs of Christendom were dumped into the sea—barren, perhaps, half a dozen."

St. John Forbes, M. D., fellow of the Royal College of Physicians, London, says: "Some patients get well with the aid of medicine, more without it, and still more in spite of it."

Some of our eminent physicians are beginning to tell the people the truth about drugs. They have deceived them for centuries. They have deceived their own people. At last, so about as long as they can, unless they check the advance of science.

Dear Sir—Since wearing your Belt, I have been in better health than I ever was before. It did me more good in three weeks than all the drugs I ever took and the old symptoms have never returned, as I expected they would. It has certainly built me up in every respect. I consider that your Belt saved my life. I tell every one I can about your Belt.

Yours truly,
V. E. BRAZEAU,
Box 66, Sturgeon Falls, Ont.

It is science that has taught us this. I have proved that electricity runs our bodies and produces what we call life. It has shown that most all sickness and chronic disorders are due to lack of electric energy. It has taught us the worthlessness of drugs, that they are only poisons, and poisons don't cure.

The reason drugs don't cure is because they do not help nature. Nature needs electricity, nourishment, something that builds up. Drugs contain no nourishment—no electricity—just poison, which kills.

My way of curing is to restore electricity where it is needed, and the sickness will disappear. That's because electricity gives strength, power, to the body, enabling every organ to perform its work properly, and when every organ is in a strong, healthy condition there can be no sickness.

Wear my Electric Belt while you sleep. It feeds a constant stream of electricity to your nerves, and they carry it to every part of your body, restoring health and vim.

My Belt is a simple electric appliance, constructed on scientific principles, and is the product of my 20 years' experience in trying with electricity.

If you are afflicted with any of the following ailments, you will find your Belt a reasonable security for the price of the Belt, and you will be cured.

WHEN TO WEAR

FREE BOOK ABOUT STRENGTH OF MEN

You ought to read my free 80-page illustrated book regarding the cure of disorders, without drugs. This book explains many things you should know. It tells all about my Belt, and cost of treatment. It is absolutely free, if you'll bring or mail me this coupon. Cut out the coupon now.

POWER FROM POTATOES

Cultured potatoes will be furnishing the power for the gang-ply and the engine in the farm before many more years go by. A bushel of cultured potatoes is worth 36 cents. Turned into denatured alcohol they would be worth 72 cents. The process of extracting the alcohol is not one that every farmer can carry on, but the alcohol is there all right.

Alcohol is produced by the fermentation of sugar. Potatoes contain starch that may be converted into sugar by the addition of malt and then fermented. These potatoes are steamed until the starch is

cooked thoroughly. Then the malt is added. When the starch has been converted into sugar a yeast mash is added and the sugar is fermented. What is left from the potato mash can be fed to cattle. Experiments have proved that the mash has a high feeding value.

Denatured alcohol is used for heating and lighting, in chemicals, in varnishes, in explosives and as a fuel for engines. For some years the tax laws were such that alcohol was too expensive as fuel for engines. For this reason machinery has not been adapted for using denatured alcohol. But it is coming into use.

The United States Department of Agriculture has issued a bulletin recently on

SPORT NEWS OF A DAY; HOME AND ABROAD

Baseball
The Game Today.

Al. White, the man who was causing Joe Page so much uneasiness, arrived in the city last evening and will probably catch this afternoon. Upland, the new box performer for the Marathons, came with him and will adorn the bench today.

Marathons—Fraser, 2nd base; Winters, p.; Williams, 3rd base; Riley, short stop; Donnelly, 1st base; Conroy, catcher; Nelson, left field; Lynch, centre field; Tarbell, right field.

St. John's—Kansay, 2nd base; Dolan, centre field; Pinkerton, short stop; Saborin, left field; Bramsey, right field; Mulvey, 3rd base; Britt, 1st base; White or Lewis, catcher; Paquette or Ford, pitcher.

Remember the game is a league one and will start at 3 o'clock.

Local Notes

It is reported that Marvin Peasley, pitcher, has resigned from the Woodstock team, and has decided to get out of the game for this season.

The Halifax baseball team played a tie game with the Moncton team in Moncton last night, 3 to 3. McLellan and Weldon pitched for Moncton and Innes for Halifax. Another game is to be played today.

National League results yesterday were: Boston 5, Cincinnati 4; Chicago 6, New York 5; St. Louis 9, Philadelphia 4; Pittsburgh 6, Brooklyn 7.

American League—St. Louis 1, Boston 6; Cleveland 1, Philadelphia 7; Chicago 5, New York 3; Washington 3, Detroit 2.

Eastern League—Providence 3, Jersey City 4; Montreal 8, Rochester 6; Newark 0, Baltimore 1; Buffalo 3, Toronto 4; Buffalo 9, Toronto 8.

A Game Away Back in '38

Disputing the officials of one of the minor leagues who contended at the beginning of a recent baseball season that the first ball pitched in the game was the first ball ever used in a championship match in the States, Josh E. Waterhouse of Emporia, Kan., who says he has the first ball ever used in a game for the title of New England, hunted through the back files of the Boston Herald recently for the story of that memorable day on Boston Common in 1838.

The story as published in the Boston Herald of Sept. 10 of that year told how the Portland club of Portland, Me., met and defeated the Tri-Mountain Club of Boston with a lead of five runs and how this game was the first to be played in Boston using the same layout of bases as is used in the present game. At that time the ball was pitched and not thrown, and the winners scored a total of 147 runs.

Waterhouse, then a lad of 13 years, came to Boston as the mascot of the Portland team. A few days ago he returned to Boston to take part in the hotel men's convention, and to substantiate his claim will carry back to his cattle ranch a copy of the Herald's story of that date.

"Many years after the game which I remember, distinctly," Sam Chadwick, the shorthand and secretary who he carried Club gave me the ball, which

"Boxers pull, haul and hit in clinches because some of them have become accustomed to what is known as fighting, and they are a great deal better than boxing close to their opponents than in sparring at a range. They try to tire out their opponents by pulling and hauling which is quite scientific in its way, and by no means as rough as it appears. It is often the style of some boxers to win this way. Sometimes accidents will happen to fighting as they will in any other sport.

"On the other hand, a clever and rangy boxer wants to be at arm's length because that is his style and it is at that kind of boxing that he is at his best.

"The reason why one boxer will strike his opponent when the latter is apparently only half off the floor is that the boxer's feet are planted on the floor and his head is above his knees. Under the rules a man crouching is just as much up as the man who is erect with his hands in position.

"Boxers seldom have any personal spite, and they show this by shaking hands. It is purely a matter of business with them. It is very seldom that two good boxers face each other in a ring with their hands against each other. Mind, I am not claiming that every boxer is a good one, for of the professions in the world there is a smaller percentage of good men in the ring than in any other business.

"People who don't see many boxing bouts may occasionally see a poor one, and become prejudiced against the sport. They simply judge all by one poor exhibition, probably put up by two men who are not really scientific boxers. The same mistake may occur in any line of sport.

"I have often been asked why a man can be knocked down, get up, and continue the bout and then claim that he has not been hurt at all. In the first place a boxer or any man who has ever been knocked down, and then claims that he is not hurt, is purely a matter of business with him. It is very seldom that two good boxers face each other in a ring with their hands against each other. Mind, I am not claiming that every boxer is a good one, for of the professions in the world there is a smaller percentage of good men in the ring than in any other business.

Mind, I am not claiming that every boxer is a good one, for of the professions in the world there is a smaller percentage of good men in the ring than in any other business.

"People who don't see many boxing bouts may occasionally see a poor one, and become prejudiced against the sport. They simply judge all by one poor exhibition, probably put up by two men who are not really scientific boxers. The same mistake may occur in any line of sport.

"I have often been asked why a man can be knocked down, get up, and continue the bout and then claim that he has not been hurt at all. In the first place a boxer or any man who has ever been knocked down, and then claims that he is not hurt, is purely a matter of business with him. It is very seldom that two good boxers face each other in a ring with their hands against each other. Mind, I am not claiming that every boxer is a good one, for of the professions in the world there is a smaller percentage of good men in the ring than in any other business.
