

was on Tuesday elected without opposition, in the room of Mr. Logan.

The Hull Committee. This investigation, is at length terminated; it may be cited as a curious proof of the purity and economy introduced into Parliamentary elections by the Reform Bill. The scrutiny will, it is thought, entail a cost of seventy thousand pounds on the parties interested.

In the Court of Chancery, Dublin, a decree was pronounced against Mr. O'Connell for £125 for tithes due to the Rev. F. Denny, which Mr. O'Connell admitted to be due, but refused to pay. The cause was undefended.

Lords *Surrey* and *Fitzalan*, with that proper respect for religion and honor which distinguishes them from the professors of their creed, both abstained from voting on Lord *John Russell's* motion on Thursday last. The conduct of these two noble lords on church matters is worthy of all praise. It is evident that they, at least, are fully impressed with the binding character of the oaths they have solemnly taken.

THE STAR
WEDNESDAY, JUNE 13, 1838.

During the recent heavy rain on Wednesday last, a large portion of the cliff at RED-CLIFF COVE, near MICHAEL KEEFE'S at the Grove in this Port, fountered with an appalling noise like thunder;—the fall was distinctly heard at the Court House, being more than a mile from the scene of destruction, and for some time was supposed to have been occasioned by thunder. We have visited the spot, and found that nearly half an acre of ground had been detached from the main land, and moved towards the sea, leaving a chasm of about one hundred yards in length, by thirty yards wide, and about forty feet deep; the portion of land detached has the trees growing upon it, with no appearance of having been disturbed; the chasm is now, where the road was. Some have attributed this phenomenon to the unusual quantity of rain that fell on that day; but as the ground gradually sloped to the margin of the precipice, and there was no place for the water to lodge, we think it was caused by some sudden and secret effort of nature. A fine field is now open for geological research, and we are in hopes that some of our well-read professors of inter-macy with that science, will be enabled to throw a light upon a subject interesting to all.
