which it would be his endeavor to secure, and good creosote, which the city possesses in considerable quantity, he possesses in considerable quantity, he regults from the coast to Columbia river according to the possesses in considerable quantity. would guarantee that the best results good man for the position. They de-would be obtained. He would stake his clared that the committee were divided Midway which was specifically called reputation as an engineer on this. ing this statement from Mr. Bryson he thought the council should have no charges, so also were Liberal members the railway from Princeton to the

work.

Mayor Morley concurred in this view.

This the Liberal members stoutly deremarking that while he personally felt nied, pointing out also that action of that the council should proceed very carefully with its scheme of paving, so as to have a uniform system, yet in view of the fact that much work had was most absurd and unprecedented been authorized by the old council there was nothing for it but to go ahead with the work. The blocks laid fusing to listen to further argument, in the past ten years had been of the poorest kind, and he would rather "chuck the whole job" than put down any more of that kind, but in view of the assurance of the acting city en gineer he would be in favor of con pleting the work ordered as soon as possible. He moved that the counci ommend that the contract be awarded for the blocks which will be required, and this motion carried.
