FINANCIAL WORLD

STRONGER TONE IN THE STOCK MARKET

New York, Nov. 16.—Renewed strength was exhibited by the stock market today after several days of declining prices. Trading was not heavy and changes were not large but the weakness of the list disappeared. Operations centered largely about Union Pacific, which was brought into prominence by the issuance of its annual report. In view of the conditions under which the railroad of the country have operated during the past year, the report was regarded in the stock market as distinctly favorable. Union Pacific was bought heavily and during the day showed a gain of more than two points. Its strength was a tonic for the market and after an early period of weakness the whole list rose in response to more active buying. Trading was still largely professional, however, and the demand was not well sustained. During the afternoon prices shaded.

Lehigh Valley, which received a check in its advance yesterday, was weak at the opening, but rose in response to a renewal of speculative operations. It was supported consistently, and at the close that stock and Union Pacific were the strongest of the active speculative issues. Among the less active stocks, the strength of the southern group was most pronounced. Louisville and Nashville rose five points and Atlantic Coast Line three.

The largest amount of gold reserved for export in a single day within the many months, was the total of \$5,250,000 engaged for shipment to Canada, in payment for Canadian bonds in connection with financing undertakings by American interests. It was reported also that a shipment of gold was to be made to Argentina next week for a Paris institution.

Bankers were not surprised at indications of a gold movement to South America for the account of Europe at this time, on account of the present ease of money and the relatively high rates of exchange. Funds are in light demand in Europe, otherwise, in the opinion of international bankers, advantage would be taken of the present condition for the exportation of gold direct to Europe. As there is no immediate need of funds there, foreign bankers apparently have begun to settle their trade balances with South America by drawing gold from this market.

Another decrease in the European supply of copper was shown in the monthly statement, a showing which was regarded as confirmatory of reports of the enlarged foreign demand. Recent shipments from this side, moreover, have been on a fairly large basis.

The shrinkage within the last two weeks brings down the total to the lowest point recorded since June of 1909.

Refusal of the U. S. Circuit Court to permit independent tobacco interests to intervene in the American Tobacco reorganization proceedings, and the attitude of the Attorney General toward the plan, approved by the court were referred to as influences which sustained the strength of the market. The expressed determination of the opponents of the plan to take the matter before the highest tribunal, however, delayed the final approval which Wall street hopes will open up the method of distributing grating combines which are offensive to the law.

Bonds were steady with Seaboard Air Line issues active and strong. Total sales, par value, \$3,161,000. U. S. Registered bonds declined 1-8 on call.

7 Per Cent. Preferred Stock

Sold with a bonus of 25 per cent. of Common Stock. Business established 1870. Largest manufacturers in Canada of Men's Shirts, Collars, Hosiery, Underwear, etc.

CAPITALIZATION.

Authorized. Issued.

7 per cent Cumulative Preferred

Stock \$1,250,000 \$800,000

Common \$1,250,000 600,000

EARNINGS.

The net earnings of the Company for years ending 1910-11 are as follows:

12 months, ending May 31

1910

1911

This is sufficient to pay Preferred Stock Dividends and over 8 per cent. on the Common.

The Preferred with its 7 per cent. Cumulative dividend represents an attractive investment, while the Common Stock, which is received as a bonus, has great speculative possibilities.
