## RECORD OF MAINE'S SPORTING SEASON

### Annual Report of the Fish and Game Commission.

Augusta, Me., Dec. 29-The annual report of the commissioners of inland fisheries and came, Leroy T. Carleton, of Winthrop, Henry O. Stanley of Dixfield and Edgar E. Ring, of Orono, was submitted

The report says in part: "The necessity for the better protection of the big game in the state and the game birds, and fish on the spawning beds has attracted widespread attention throughout the state, as well as in the neighboring states, thuring the past year. It has been much discussed by our people generally. The need of more money for warden service seems to be generally conceded, if we are to retain our big game in any sufficient quantities to attract visiting sportsmen, or to reasonably astisfy our people, whose number actually increases, who go a bunting, or obtain a livelihood out of our big game interests.

game interests.
"There are five fish hatcheries and feeding stations in the state, located as follows. Sebago lake, East Auburn, Monmouth, Winthrop, Moosehead lake and Caribou. A million and a quarter of fish were hatched, with a loss of 11 per cent., and were planted in the public waters of

"More people have come to Maine this year to fish and to hunt and to spend a vacation than ever before in the history of the state. A careful canvass of the state has been made, and it shows some surprising results. It is shown that 133, 885 different persons have come into the inland territory of the state to spend some sort of an extended vacation.

"From returns from those who actually entertained these people it is shown that \$1,371,201 were expended by them in the state for board alone, exclusive for what they paid for radiroad fares, steam boat and electric ratiroad fares, team have, guides or purchases at the stores and

Anecdotes of the late Archbishop of Canterbury are going the rounds. Here's one: Said a pert young woman to the late archbishop: "I do believe there is such a thing as fate. Now, I have an aunt who I know was born under a lucky star.

steamer, but just missed it by five minutes. She took the next boat, and when she arrived at the end of her journey she learned that the ship she had missed had been wrecked. Now, don't you think that was good fortune, pure and simple?"
"I don't know," answered the archbishop, "I never met your aunt."

One-half of the increase in the shipments occurs in St. John, and is largely on account of logs left in the brooks during the spring of 1901, that could not be got to market on account of poor freshets. The demand

hauls in the woods—in some cases only two loads being hauled to the brooks per day—more expense in brook-driving and higher wages, the free on board value must advance rather than decline.

Nova Scotia shows a falling off of 15,000 standards from last year, and from what we can learn from reliable sources, that province reached its maximum shipment in 1901, and each succeeding year must show a decrease. A considerable portion of Nova Scotia shipments consists of hardwood, such as birch, beech and maple, with considerable hemlock; and without these woods the present volume of New Brunswick exports, could not be maintained.

Freights appear to have reached low-wafer mark, and it is hard to realize how steamers can be maintained at any lower rates than now ruling; and if ship owners lay up many of their boats, we must look for an advarice in freights in the near future. Saling vessels have been almost entirely driven out of the lumber carrying trade of this section, by the low freights accepted by steam. Shipments from Miramichi for 10 years from 1893 to 1992 inclusive, in round numbers, were: 1893, 83,000,000 superficial feet; 1894, 96,000,000; 1895, 82,000,000; 1896, 106,000,000; 1897, 102,000,000; 1898, 113,000,000; 1899, 129,000,000; 1900, 122,000,000.

spring of 1901, that could not be got to market on account of poor treshets. The demand made last winter for lumber to fill up the winter port liners induced the rotary mills to saw all the available stock within easy reach of that port and also accounts to some extent for this increase. Considerable increases also appear in Dalhouse, Campbellton and Sackville.

Miramichi shows a decrease of over 2,700 standards, and as the stock wintering on the river this season is 7,500 standards less than last year and the operations not any greater than last winter, which was all the mills could saw, we look for some falling off in the shipments for 1903.

The season so far has been favorable for woods work, but, the searcity of labor, and the high wages demanded by woodsmen, made all lumbermen later than usual getting into the woods, and has curtailed the output of the larger operators.
