Electrical Heating Devices FOR THE HOUSEHOLD

RELIABILITY AND ECONOMY

3-pound Flat Iron for
Sewing Room or Nursery

The heating and cooking appli-
ances designed and manufactured
by the Canadian General Electric
Company mark a new epoch in
domestic science in that they em-
ploy electricity to generate heat
with absolute reliability and (when
properly used) with excellent econ-
omy. They are SAFE even in the
hands of the unskillful, and are
practically INDESTRUCTIBLE.

Serviceability has been a SINE QUA NON in the design of
these appliances, and they may
be expected to withstand about
the same treatment that ordinary
household utensils receive. They
will not "burn out" when the cur-
rent is thoughtlessly left "on," al-
though such practise is, of course,
not recommended. The dishes
are made without solder, and the
heating unit has remarkably LONG
LIFE.
