The John Abell Engine and Machine Works, Toronto

THE "DUPLEX" CORN & FEED MILL

Why the "Duplex" should be bought in preference to all others:

- 1st—Because it is a Duplex Mill, and having double grinders, is capable of doing much more work than any other mill the same size.
- 2nd—Because it is the only Mill in the world that grinds on both sides of the revolving burr at the same time.
- 3rd—Because it is the most perfect in construction, the strongest and most durable.
- 4th—Because it produces better meal; does not heat by long running, having no toe to get hot.
- 5th—Because the grinding rings cannot be injured by the Mill running empty, and if broken by accident can easily be replaced.
- 6th—Because it has a positive face feed, gradual reduction plates, a continuous frame; and because it is the only Mill that grinds ear corn and all small grain with equally good results.

Having secured the patent of the above Mill for the Dominion of Canada, I am now prepared to supply the "Duplex" Corn and Feed Mill.

For further particulars address

263-tf JOHN ABELL, Toronto.

THE RACER.

THIN BACK, LANCE TOOTH, CROSS-CUT SAW.

It stands without a rival and is the fastest cutting Saw in the world. It has beaten the best Canadian and American made Saws 33 1/2 percent in every contest. Its superiority consists in its excellent temper. It is tempered under the Secret Chemical process, which toughens and refines the steel. It gives a finer and keener cutting edge, and will hold it twice as long as by any other process. We have the sole right for this process for the Dominion of Canada. None genuine that are not like the above cut, with registered Trade Mark, with the words "The Racer," and the Maple Leaf with our name. Price \$1.00 per foot.

CAUTION.—Beware of Counterfeits. There are inferior Counterfeits on the Markets. They are intended to be sold at a high price upon the reputation of this Saw. We will send to any address a Saw exactly like any Counterfeit, warranted equal in quality, or no sale, at 60c. per foot. Therefore do not be humbugged into paying a first-class price for a second-class saw. A fact to bear in mind that if the material and temper are not of the very best quality the shape of the teeth amounts to nothing. A saw, like a knife, will not cut fast without it will hold a keen cutting edge. We have cut off a 14-inch sound basswood log in eight seconds with this saw. Manufactured only by

SHURLY & DIETRICH,

Saw Manufacturers; GALT, ONT.
