

Massey-Harris

The Ideal Winter Feed

THE Silo preserves more of the food materials of the original fodder for feeding stock than any other method now known. Your ensilage will be juicy, palatable, and high in food value if you get the corn into the silo quickly.

A good ensilage cutter is essential. The Massey-Harris is easy, economical and safe to operate. It has a capacity for cutting from three to eight tons per hour, depending on the size and condition of corn, length of cut, etc., and is smooth running and durable. The Massey-Harris local Agent will give you further particulars.
