For Drilling Upper Holes

There's a Sullivan Stoper

exactly suited to your needs. If your ground is soft or broken, choose "DF21" Light-hitting Stopers. If your ground is hard and tight, choose "DG21" Heavy-hitting Stopers. Then there's the "DA21" for average conditions, and the "DC21," with air jet, for flat holes. An atomizer, for laying dust, may be attached to any of these drills.

Sullivan Stopers of all types are profit-earners. Their great cutting speed, low air consumption and splendid stability render them favorites in many of the world's mining districts.

**They're Fast.
They Last.**
