Renovating Horses.

A month to grass will work a wonderful change with a horse which is feverish and getting staid. We used to turn our horses out at night, and keep them in the way. And the run to the grass was just like a laxative to get the blood and the fat out of the system.

When a horse is kept on dry food and fed for a long time, and he gets fat, and the grain does not seem to have any effect in sustaining the system that it is in the body. The change is a simulation, and the horse is not so fat as he looks. The change is a simulation, and the horse is not so fat as he looks.
