

(Continued from first page)

more than a ton. But without so much as a picture to go by, with not a word of printed or written instructions, the machine went together, and on Saturday last was tried out to most complete satisfaction. So smoothly did the screw-on giant do its work that occupants of another portion of the building did not know that the press was being run to its speed limit. The press itself weighs 7½ tons and stands on a concrete foundation which required 50 barrels of gravel and sand, two cords of rock and five barrels of cement.

The other machinery of the office is in thorough keeping with the requirements of a first class printer, and is continually being added to as occasion requires. We are equipped for any job that comes, ordinarily, and when the rare one comes that calls for what we haven't got in the way of equipment—well, we get it.

MAKE YOURSELF STRONG

People with strong constitutions escape most of the minor ills that make life miserable for others. Don't you envy the friend who does not know what a headache is, whose digestion is perfect, and who sleeps soundly at night? How far do you come from this description? Have you ever made an earnest effort to strengthen your constitution, to build up your system to ward off discomfort and disease? Unless you have an organic disease it is generally possible to improve your physical condition so that perfect health will be yours. The first thing to be done is to build up your blood as poor blood is the source of physical weakness. To build up the blood Dr. Williams' Pink Pills is just the medicine you need. Every dose helps to make new blood which reaches every nerve and every part of the body, bringing color to the cheeks, brightness to the eyes, a steadiness to the hands, a good appetite and splendid energy. Thousands throughout the country whose condition once made them despair, owe their present good health to this medicine. If you are one of the weak and ailing give Dr. Williams' Pink Pills a fair trial and note the daily gain in new health and abounding vitality.

You can get these pills through any medicine dealer or by mail, post paid at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

MAY EXTEND SEASON FOR SALMON

The July freshet in the St. John River, the second which has occurred since the opening of navigation, has seriously affected the salmon fishing practically all fishermen being compelled to withdraw their nets on account of high water. This coupled with the fact that the salmon run was poor early in the season has made total catches very light. This has caused already an agitation for the extension of the open season after August 15th the date set by law for the close of netting for salmon. There also is a movement to permit continuous fishing between Crook's Point and Anderson bridge instead of during alternate fortnights as at present. It is understood that the officials of the Department of Fisheries are not favorable to either request although it is probable that petitions will be forwarded to Ottawa.

Although the net fishermen have had poor luck it is said that there has been a good run of salmon and that anglers on the Tobique have had good luck.

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to a child. Cholera infantum, diarrhoea, dysentery and stomach troubles are ripe at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevent stomach and bowels troubles, or if the trouble comes suddenly—as it generally does—the Tablets will bring the baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Letter From R. McKenzie

Mr. C. L. Smith has received the following letter which speaks for itself:

Mr. C. L. Smith,
Woodstock, N. B.

Mr. dear Mr. Smith,—
Pressure of work since I returned prevented me writing you sooner to express my appreciation of the kindness of yourself and Mrs. Smith that you had shown me while in New Brunswick. I enjoyed that trip very much and will always remember the friendly reception I received in your home, and would like to repeat the same experience next summer if circumstances would permit.

I remained over two days in Montreal on my way back and attended a meeting of farmers at Buckingham, reaching home on the evening of the 4th.

We had a meeting of the Canadian Council of Agriculture the two following days and a meeting of the directors of the United Grain Growers the following week, which took up five days.

The Canadian Council of Agriculture were very much interested in my report of the progress of the United Farmers of New Brunswick and the evident desire on the part of the farmers of New Brunswick for organization in doing their part in moulding public opinion so that the common people will receive more equitable treatment in public affairs.

I want to tell you that I think there is a great future in store for the U. F. N. B. but that can only be brought about through strenuous efforts on the part of the leaders of the movement and naturally a large amount of the work involved will fall upon yourself and Mr. Sharpe, Secretary. I know from experience that there are many trying circumstances with which you will be confronted and at times you will meet with discouragement, but the consciousness that you are engaged in a great work that has for its purpose the betterment of the people will be a sustaining factor in helping you to overcome those discouragements. Your reward will not be in dollars and cents but in the consciousness of having done your part in making this world a little better.

The Canadian Council have taken another step in extending the development of the farmers' movement in appointing Mr. N. P. Lambert, as secretary, in my place, thus relieving me of the detail work of the office.

Mr. Lambert is a man of wide experience as a journalist, and in the carrying out of his work for a number of years past has gained a very wide experience of the needs of the farm population and its relation to other industries. Much of this time will be taken up in preparing articles for publication in newspapers and magazines, and preparing literature on economics and organization of the farm population for distribution in the different provinces. I feel he is going to be quite an acquisition to the workers in the movement and will help a great deal in getting the East and West closer together than they have been.

I would like very much to hear from you from time to time as to the progress that you make and how the organization is progressing.

The harvest prospects in the Prairie provinces this year are not very encouraging. There are large areas in southern Alberta and southern Saskatchewan in which the crop has burnt up for want of rain. The drought has also caused a great scarcity of feed. The farmers are already commencing

to crowd their best animals on the market.

Remember me to Mrs. Smith and Miss Smith. I am,

Yours truly,
R. McKenzie
Winnipeg, July 20, 1918.

For Co-Operation

W. R. Reek, provincial secretary for agriculture, submitted to Premier Foster a plan for bringing together city men, who are willing to aid in food production, and the farmers, who are in need of extra labour during the harvest season. Mr. Reek explains that the farmers recognized the need of increased production and increased acreage under cultivation. Farmers now complain that labour is very scarce and the extra crops will be wasted unless they can be harvested. If there is not enough men on the farms to cope with the situation, they must be procured from the city. Mr. Reek says there are hundreds of men in the cities who have been raised on farms, and many others who have had some farm experience, and he believes that many of these would be willing to take some time from their other work and devote their vacations to farm work.

Alcohol in Liquor Seized to Be Reclaimed

W. D. Wilson, chief inspector under the prohibition act, while in Ottawa recently made representations to the federal authorities which resulted in the authority being given him to reclaim all alcohol from all liquors seized by himself or his deputies under the Intoxicating Liquors Act, 1916. Mr. Wilson states that the reclamation will be carried on in this province, the officials of the inland revenue department having supervision of it.

Prior to making the application at Ottawa, Chief Inspector Wilson had a number of experiments made with samples of liquor which had been seized. One sample showed alcohol of 95 per cent. A second sample showed 88 per cent. A third, which had been seized at Miramichi, contained only 73 per cent. In many cases the liquor which is seized by inspectors cannot be designated by

name, it is merely liquor with intoxicating qualities. The alcohol, when reclaimed, can be used for commercial purposes or for external application.

Sugar Conservation Imperative

There will be no sugar from Japan available this year for British consumption, according to a recent statement of the Chairman of the Sugar Committee. The Cuban crop is 300,000 tons less than estimated. Conservation of sugar for preserving time is imperative upon every householder.

Shave?

The best work in Hardland or, in fact, north of St. John is done in our shop on Depot Street. Razors, Brushes, Creams and Pipes.

BANK OF MONTREAL

ESTABLISHED OVER 100 YEARS

Farm Production

To assist the Farmers in increasing production the Bank of Montreal is prepared to make advances to responsible parties for the purchase of sheep.

C. S. Baker, Manager, Hardland Branch.

YOU want to sell Your FARM!

I want to! help you!

I have made a careful study of the problem of bringing the man who wants to buy into communication with the man who wants to sell, and the results attained are a guarantee of the success of my system of operation. During the eight years of my experience in the Real Estate business nearly Two hundred Farms have been sold through my agency, representing values aggregating over Half a Million Dollars.

I have at present thirty-two applications for farms in Carleton County for the Spring 1918. If you want to sell your farm at a fair value, communicate with me at once.

Don't Waste Your Time and Mine if You Are Looking For More Than Your Farm is Worth.
