

Turning now to the single flowered varieties, which—though having not the same persistence of bloom, and therefore not as desirable as the double for cut flowers and bouquets—are better adapted for bedding out, and are more showy as pot plants; we will name a few that seem to possess some desirable quality or character that makes them worthy of attention.

**BEAUTY OF KINGSESSING.** We have been much pleased with this, for it is indeed a beauty. The petals are nearly white when newly open, shading towards the centre from light pink to salmon, the upper petals veined with salmon. As the blooms acquire age the white changes to a most delicate light-pink. The trusses are very large and produced in great profusion. The habit of the plant is good, the leaves slightly zoned, and when it is well grown and flowered it makes a most beautiful pot plant.

**TRIUMPHANT** is somewhat related to the foregoing in general appearance, though quite distinct. The three lower petals of each flower are white delicately tinged with blush, while the two upper petals are a light salmon beautifully feathered with rose. The trusses are large and numerous, borne well above the leaves, which are of a deep green with a broad black zone. It is of no value for bedding out, but makes a very showy and beautiful window plant.

**DAZZLER** is worthy of its name. To say that it is an improvement on Jean Sisley or Sir Charles Napier would hardly be correct, for each of these holds a place of its own; and yet it is very like them both, but with a distinct rich velvety scarlet so set off by its clear white eye, and lit up with such a peculiar brilliancy that you say it is quite distinct from either. The flowers are of perfect form, borne in full round trusses, which are very abundant. We value it exceedingly.

**NELLIE COOKE** is an exceedingly rich bright salmon flower of perfect form, contrasting beautifully with the deep-green broadly zoned leaves. The trusses are not large but very numerous, and when the plant is well flowered it presents a very attractive appearance.

**APPLE-BLOSSOM** has been well named, for it is the very counterpart of some of our pink-and-white apple blossoms. The trusses are very large and finely formed, and the plant, when in full bloom, arrests the attention at once by its peculiar, delicately tinted flowers. This is sure to be a favorite variety with all geranium growers for
