COMMENT FROM MONTH TO MONTH

The Ontario Territorial Elections to the Medical Council are to take place on the first day of December, and nominations are to be received up to the 13th day of November.

Whilst in no wise wishing to make these political, it would seem to be very important that, where any changes in representation are contemplated, prominent medical men in close touch with the powers that be, should be invariably elected.

Within the lifetime of the next Medical Council important changes will, no doubt, be enacted in the laws governing the practice of medicine in this province, and there is need for the best possible representatives on the Council.

It is to be hoped that a strong, able, and active body will be elected to press for those reforms so urgently needed.

Preventive Medicine will take a foremost part in the present great European war.

The fact that the Imperial authorities have called upon Sir William Osler to sound a clarion warning is significant.
