

KAMLOOPS B. C.

the furthest developed yet, and, at the 750 foot level, they have struck the richest ore, a large amount being ready for treatment. Iron, silver, lead, zinc, cinnabar, coal, etc., all abound. The Glen Mine has a good body of magnetite ore. This important factor in smelter work would be very valuable to a local concern. Cheap power and fuel being available, all that is needed is work on a scale large enough to minimise costs.

Industries, etc.

Manufacturing is in its infancy, but there exist a large brick yard, two lumber and planing mills (shut down temporarily at present), a brewery, ice and cold storage plant, bottling works, machine shops and foundry, automobile agencies, garage, etc., cigar factories, sash and door factory, as well as that valuable adjunct to modern life,

Beauty and Utility
