THE SUPREME TEST

After you have selected your Top Coat and we send it home, it must pass inspection from every member of the family and 'tis then, if ever, that the supreme test of a garment's worth is made. There is no affable salesman there to pat it into shape or explain any little detail of fit and finish; it's got to stand alone on its merits. We never have any fear as to the reception any of our garments will get, and the fact that we sell every one subject to the "home test" or your money back is the best evidence we have to offer you of our confidence in the quality, fit and dependable finish of our clothing, also the value of the fabrics that enter into the manufacture of every coat we turn out.

Overcoats that show fashion's fancy in every line, \$10.00, \$12.00, \$15.00 and up to \$45.00.

Don't miss seeing our display of English Top Coats, the finest in the land.

ANOTHER LINK IN HYDRO CHAIN

Serve Twelve Municipalities Opened.

HUGE CONCRETE DAM

Half Mile Long and Fifty Feet High-Largest in

fternoon pushed the button which set of hydro current to serve twelve municipalities. Ultimately the newest addition to the chain of hydro-electric power plants will develop 8000 horse power and serve twenty-four towns and villages, the chief of which are Owen Sound, Mount Forest, Orange-ville, Meaford, Kincardine and Grand

ville, Meaford, Kincardine and Grand Valley.

The Ontario Hydro Commission, Sir Adam Beck, Hon. I. B. Lucas, W. K. McNaught and the engineers attended the ceremony and after lunch in the power house the two former made short addresses to the representatives present. Sir Adam briefly described the development of the Eugenia Falls system, pointing out that the present plant was successfully designed by the commission's engineers after a private corporation had exploited the water power with minor success. Where the corporation had 300 feet of fall for power development, the commission had engineered 500, with almost double the power production.

Largest Dam in Canada.

The big work was begun in July, 1914, and was completed a few weeks ago, in 14 months. One huge concrete dam, half a mile in length and fifty feet in height, the largest in Canada, dams the Beaver River in its old

ada, dams the Beaver River in its old course thru Eugenia, and there are four other minor dams connected with

years, Sir Adam said in his address.
"The total cost of your power plant is \$1,071,000, and I am glad to say that we completed it well within the estimated cost."

"If you have read the press you will see that we have asked the government to sanction the development at Nuagara Falls of an additional 600,000 horse-power, which with our present supply totals 700,000 avail-able from Nuagara," Sir Adam said in connection with queries as to where they would get the power which the future would demand. The speaker declared that ultimately the system of hydro power would be spread and linked up with the Eugenia all over Ontario. "No more in the future will these valuable waterways for power development be allowed to fall into the hands of private interests," he said.

Politics Kept Out.

Politics had been kept out entirely of hydro matters, Sir Adam said. He referred briefly to the hydro radials

of hydro matters, Sir Adam said. He referred briefly to the hydro radials which would be constructed and operated thruout the province on the same system as the power distribution.

"Out of 124 municipalities using hydro only half a dozen are not laying by a big surplus." Sir Adam said. The success of the hydro movement, he said, depended largely on the cooperation of the municipalities with the commission.

Hop. I. B. Lucas gave full tribute to

the commission.

Hon. I. B. Lucas gave full tribute to Sir Adam for the hydro movement. The Ontario Government, he told the representatives, had little to do with it except lend the money.

On behalf of Owen Sound and the representative municipalities Mayor McQuaker said he was glad they had the sense to stand behind the commission and get into the hydro movemission and get into the hydro movement. Only a man of Sir Adam's calibre could have overcome the "fierce" opposition encountered from ome sources.

FIFTY THOUSAND CLUB NOW FULLY ORGANIZED

Campaign to Raise Monthly Contribution Will Be Launched Today.

Organization for the 50,000 Club was completed at an enthusiastic meeting held in the offices of the board of trade, Royal Bank Building, last night, and today the campaign starts, with the city divided into 50 districts, each district being in the charge of a captain trict being in the charge of a captain, assisted by sub-captains and can-

In a brief address P. H. McCreath the chairman, set forth the objects of the association, which is in a measure the association, which is in a measure an auxiliary to the patriotic fund. The club has been formed to give every man and woman in Toronto an op-portunity to subscribe a definite amount—25 cents weekly, 50 cents semi-monthly, or a dollar monthly—to the Toronto and York Patriotic Fund As-sociation for the duration of the war.
