

OPEN YOUR VAULTS AND LET THE MONEY ROLL IN.

The Key to your Safe and a Steady Stream of Profits is the Allis Double Cutting Band Mill

That's because it will increase your output 30 to 40 per cent. without increasing your expenses of operation, thus furnishing a net gain in your profits of at least one-third.

The Allis Double Cutting Band Mill will actually put out from 30 to 40 per cent. more lumber than a single mill and will use no more men or require no greater expense of operation than a single mill.

For example—If your profits on your single band mill are \$75 a day now, the Allis double cutting attachment will increase them to \$100 a day. It requires no deep reasoning to see what a steady stream of profits the Allis Double Cutting Band Mill will turn your way. The double cutting attachment can be put on any Allis Single Band Mill without great expense and on new equipment it would be well for every mill proprietor to consider the actual net profits which will come from the use of the Allis Double Cutting Band.

We shall be pleased to take up the subject of the Allis Double Cutting Band with anyone wishing to increase their net profits either from its addition to an Allis Single Band or for new equipment.

Let us tell you too—about our Steam Set—how your profits can still be increased by 10 per cent. and save wear on men's lives.
