

## IT HAS BEEN STATED

that the consumption of paper is the measure of a people's culture. Canada then has made extraordinary advances in that art. We judge this from the remarkable increase in the quantity of paper manufactured by us.

## FROM ONE MACHINE

turning out some eight tons daily, we now have five machines producing an average of forty tons every twenty-four hours. If this is not entirely due to increased consumption, there is but one alternative—a corresponding decrease in our competitors' product—which

means that E. B. Eddy's paper is preferred to that of any other make.

And all this within the last five years!
