Dr. Wagoner is in Muskoka. The damage amounted to \$500 on the furniture and \$200 to the house.

RAILWAY COMPANY AND TOP.

By Good Organization and Hard Work They Gained the Day.

Voters of Hamilton Gave Them All They Asked For—Decline Majority Against Municipal Ownership—Sewers Bylaw Showed Under—Hamilton General News.

Hamilton, July 27.—(Special.)—About 2500 persons, out of the thousands of electors, and not more than three-eighths of the ratepayers, today decided as a body that it would be the proper and prudent thing to grant the Street Railway Company an extension of its franchise for 15 years.

Also concluded by a large majority that they did not desire the Street Railway as a municipal concern, nor did they favor the spending of \$80,000 on four new sewers.

Seeing the great importance of securing the snap vote in favor of franchise extension, the Street Railway Company put into the field an elaborate organization, assisted by the alleged Citizens' Committee, and a natural consequence brought out a larger vote than the city has been accustomed to see in bylaw fights, except in the case of the T. & E. houses.

On the other hand, the opponents of the Street Railway deal had no organization, and the voters against the extension found their way to the polling booths without the aid of specially chartered conveyances.

The proposal to buy the railway was downed by a vote of 8 to 1, but the extension received no such emphatic vote, it being less than 2 to 1.

The voting was as follows: For the city purchasing the railway \$84,000, 1828; against, 1725.

For the extension of the company's franchise, 1828; against, 923.

Sewers bylaw for 1899, against, 1725; Speechless for a Year.

One of the Incandescent Electric Lights Took Fire Without Cause.

About 1.30 this morning an incident occurred in the World composing room which was attended by a fire. One of the electric lights began to flicker, and on looking about for the cause, it was seen that the cap above one of the globes was on fire.

There were frequent flashes similar to those emitted by a Roman candle, and the globes began to glow. The fire spread through the string, which the current passes.

GOOD NEWS FROM AFAR.

Torontonian Tells of the Prospects of the West and British Columbia.

Mr. James Armstrong of the firm of Armstrong & Cook has just returned from the West, after a month's absence in British Columbia, Western Canada and the Western States.

Mr. Armstrong reports mining in British Columbia to be a promising industry, the boom having subsided, and careful work on experienced development lines is being proceeded with, and many of the properties are showing up well.

There is no lack of money for this kind of work, especially as regards gold-copper properties.

Mr. Armstrong spent nearly four weeks in Manitoba and the Northwest, making a tour of inspection of the territories of the Manitoba & Northwestern Railway, which is now becoming a most important town.

The railway company are enlarging the stock yards, and Yorkton now has the second largest accommodation for cattle of any place in Manitoba or the Territories.

Cattle are driven to this point for from 30 to 50 miles, and whole train loads are sent rapidly from the West to the East.

Mr. Armstrong reports that the cattle are weighed at Yorkton. The output of the West will exceed last year by 50 per cent, and the amount paid will go over \$200,000.

The cattle are chiefly the yearlings, and are sold at Yorkton for \$1000, and have never been so good or fed with grain.

There are many fine farms in the northwest, all of which are fenced in, enabling every farmer to be a rancher as well.

The Dominion Government, seeing the splendid success which Canadian cheese makers have made in England (the former exporting back many millions of dollars every year for that article), had determined to demonstrate that with this object in view the Government have established a factory at Yorkton.

This factory, which is the most improved plant of its kind in the Northwest, the principal one of which is located at Yorkton, is run on the most improved plan, and very large quantities of butter are made and packed for export.

There is a large creamery at Yorkton, and some of the farmers have cream separators of their own. The cream is rapidly separated from the milk, the former going straight to the creamery and the latter to the calves.

There is a large foreign population located in the West, and some of the different foreign languages being spoken in the West are very objectionable, and it is understood that the strong protest of the Government against rendering further assistance to these people.
