A Perfect Air Gun--The Benjamin

Everybody wants to shoot with a gun they can depend upon, both for accuracy and speed. A gun that is not perfectly reliable in both of these qualities is little more than useless for either target shooting or hunting.

The Benjamin, which is a genuine Pneumatic Gun, being operated entirely by compressed air, and not by a spring, as other so-called air guns, will shoot with ten times the velocity of an ordinary spring gun, and will send a shot through one-half an inch of white pine. It will also shoot with an accuracy deadly to sparrows, squirrels, etc.

It is a take-down and hammerless model. When put together it is 37 inches long; when taken down it is 23 inches. There is no danger of children using it, as in other air guns, as they have not the strength to operate it. The price is, each, 2.50.
