

JULY.

NOTES OF THE MONTH.

JULY was named, by Mark Antony, *Julius*, in memory of Julius Caesar. Formerly it was called quintilis, or the fifth month, the position it held in the calendar of Romulus. The sun enters *Leo*, the Lion, on the 23rd. Early in July the bright star Sirius, in the constellation, *Canis Major*, or the great dog, rises with the sun, and a fierce heat sets in. Hence, from the 3rd, till August 11, we have what was once called the dog days. The 15th is St. Swithin's Day, after which, it is supposed, if rain sets in, it will continue for forty days.
