

*Time for going through the Falls, near the city of St. John.*—The Falls are level, or it is still water, at about three and a half hours on the *flood*, and about two and a half on the *ebb*, so that they are passable four times in twenty-four hours, about ten or fifteen minutes at each time. No other rule can be given, as much depends on the floods in the River St. John, and the time of high water or full sea, which is often hastened by high Southerly winds. For a few days in the spring of the year, the height of water in the River St. John renders the passage of the Falls extremely difficult.
