

OUR BRITISH BUDGET.

Fourth Jubilee of the Bank of England. Edmund Yates's Sensitiveness.

Almost unnoticed has the fourth jubilee of the Bank of England gone by. It was founded in June of 1694, and the vicissitudes of fortune it had experienced from that date until 1844 would fill a large volume.

The banking system of the country; the bank charter act was passed by Sir Robert Peel, whereby the monopoly of a bank of issue was practically conferred on the Bank of England; the issue department and banking department were made separate, the national debt to be separated, and for all bank notes issued was over and above a certain amount the bank was required to have gold or silver in its coffers to the full value of these notes.

Eleven captained by W. A. Ward defeated thirty-one at the Caledonia grounds yesterday. The score was 100 to 131.

Eleven captained by W. A. Ward defeated thirty-one at the Caledonia grounds yesterday. The score was 100 to 131.

unhappily affected by miniature cataract. The largest price ever paid for a picture sold in London by auction was realized at Messrs. Christie's, when some remarkable examples of Sir Joshua Reynolds were disposed of.

The Emigrant's Information Office announced that information has been received from the Cape in the effect that a large number of clerks and shop assistants have recently emigrated to the colony, and are now without means and without prospect of employment.

At a meeting of the directors of the Lancashire and Yorkshire railway company just held, it was decided to recommend the proprietors to declare a dividend for the half year at the rate of 3-1/2 per cent. per annum.

The house of commons select committee on the volunteer question recommends power to call out in case of imminent national danger or great emergency that volunteers be subject to military law whenever under arms and in uniform; that the secretary of state have increased powers to assist in the erection of drill halls; that the volunteers be exempted from jury service.

After the brilliant wedding function of the member for the Strand, the London marriage market has been fairly quiet, but next week looks the action of the season, between Lord Egerton of Tatten and the Duchess of Buckingham and Chandos.

Many people, visitors as well as citizens of Liverpool, will be glad to hear of a new postal facility in connection with the transatlantic mail services.

Going in Line to Find a Place to Bury Themselves. Spring having arrived, each community leaves its winter home and prepares to set out into an unknown world.

While Mr. Ferguson was digging potatoes on his ranch near St. David's bridge, he discovered a small nugget in his potato.

The people of Lytton have passed a column resolution demanding that the bridge situated in the streets or gardens of Archon; and in such a case an interesting and rather amusing sight may be seen, when a procession consisting of some hundreds of the insects, and perhaps fifteen or sixteen yards in length, winds its way slowly along the road.

Let us detach two or three from the middle of the line—thus dividing it into two parties—and watch the result. The last of the foremost portion, feeling them, has been tempted to cross the Atlantic by the low rates. For two pounds many of them had been conveyed long railway journeys, were to take up New York, and on the voyage, and supplied with eating and bedding kits.

These who see the Prince of Wales but rarely have been, I am informed, greatly astonished by the change that has taken place in the appearance of his royal highness. The water or some other "stuff" for an excess of adipose tissue would have done his work in the most effective manner.

The letter class residents of St. John's Wood who can afford it are leaving London in search of a more salubrious climate of smallpox known in the metropolis for several years past. Up to now its sphere has been circumscribed to a rather poor neighborhood, but there are not wanting indications that it is spreading towards a zone bounded by Regent's Park on the one side and the North-western main line from Euston on the other.

Mr. and Mrs. Gladstone have just celebrated the 55th anniversary of their wedding, and the occasion rendered the more auspicious by the remarkably vigorous condition of Mr. Gladstone's health, despite his recent operation, and the promise that another of minor significance will be shortly necessary.

NEWS OF THE INTERIOR.

Purchasing Kootenay Ore for Shipment to Swansea. Revelstoke Mail. H. Pellet Harvey, who recently returned from England, has been commissioned by the owners of the Swansea, to purchase ore for them.

The quartz claims on Carne's creek which have been so far located are all contact veins, and are remarkable for their wealth. None of the assays so far made exceed \$22 in gold per ton.

Some magnificent specimens of gold-bearing pyrites were sent to Mr. Holdich for an assay from Trout creek. The assay gives \$200 to the ton.

Twelve miners from Nova Scotia went down on the steamer Lytton on Tuesday. They are engaged to work three claims near Nelson, which were purchased by the local capitalists last spring.

A strong mining company was formed in Revelstoke last spring, comprising ten of our prominent citizens. The company has recently recorded three claims on Carne's creek, located by John Boyd.

There is not a single money order office south of Kelowna. This fact has been pointed out in this paper before. The post office authorities are proverbially slow in meeting the wants of the section of the interior, and no great haste in supplying these requirements can be expected of them.

Mr. N. T. Edwards, who has been doing business in the city of Vancouver, arrived at Thompson's on Monday. While working on the Snow shoe he struck a lead of gold-bearing quartz four feet wide, carrying \$110 to the ton.

While Mr. Ferguson was digging potatoes on his ranch near St. David's bridge, he discovered a small nugget in his potato. The gold at St. David's must be up to the grass roots.

There was a good clean-up on the Cariboo mine, Camp McKinney, last week. John Thornton has completed five hundred feet of wing dam on Boundary creek, and commenced sluicing yesterday.

The latest assay by Mr. Gibbs of the nickel ore taken from the Steward shaft, at a depth of 25 feet, ran \$139.40 in gold. Eighty tons of concentrates from Camp McKinney are being shipped to the smelter in Penticton.

Mr. King, of the Cariboo mining company, is making the necessary arrangements for working the hydraulic claim on Back creek. Mr. Atwood is prospecting the Oro for Mr. James Douglas, and the open surface cuts disclose what may yet turn out to be a very fine vein of ore, at least present indications point to such a result.

Mr. Schofield, who is doing assessment work on the Number Seven, in Atwood's camp, is taking out good ore near the old shaft. A new shaft is also being sunk on the claim on a three foot vein. The ore is galena carrying gold and silver.

The miners in the district feel very sore over the road work being stopped. As one gentleman put it, "to have the cup of bitterness to your lips and then rudely dashed away, just as you are about to drink to the health, wealth and prosperity of the country, is too much even for a hardy miner used to all kinds of disappointments."

On the summit of Boundary mountain, a mile and a half north of the old Dewdney trail, between the Skykay and White's camp, Mr. W. T. Smith has a promising claim called the "Blackfoot," which he located last May. The lode is three feet in width, and carries free gold on the surface, which turns into sulphurets deeper down.

On the summit of Boundary mountain, a mile and a half north of the old Dewdney trail, between the Skykay and White's camp, Mr. W. T. Smith has a promising claim called the "Blackfoot," which he located last May. The lode is three feet in width, and carries free gold on the surface, which turns into sulphurets deeper down.

The fact that the wagon road will not be completed this season will be a serious hindrance to sending exhibits from Kettle river to the Vernon show. Enthusiasm does not go so far as to pack specimens of mineral and exhibits of fruit, grain, etc., over trails.

The fire on the east of Boundary creek having crossed the Norwegian gulch and burned over the country between the two creeks is liable to run into the timber to the north. It may do a great amount of damage to the miners, and with the assistance of a little wind to fan it, find its way across the mountains to Grand Prairie, which would give the people that settlement good cause to bless, or rather curse, the individual who, it seems, willfully started the fire along Boundary creek.

The through wagon road over Boundary mountain, although uncompleted, is finished within a quarter of a mile of the Helen and Capital Prize, the two comparatively recent strikes which were bonded by Mr. Sudam. The ore is rich enough to be shipped, and probably will be so if the lode has been exposed on the surface for 1800 feet.

It is now estimated that the project is entertained among several strong mining men to erect a smelting plant on the Columbia river, somewhere north of Northport, but on the Canadian side of the line, where the ores of the Nelson, Sloan, Trail creek and Boundary creek districts could be handled together.

The idea is that the latter ore, containing a large percentage of copper, could be used in the reduction of the former. There are not being sufficient variety in the Sloan and Nelson ores, or those of the Trail creek district alone. The Trail creek ores also, we understand, do not contain sufficient copper to make them selves. If such an enterprise were undertaken, however, ore from this district would necessarily have to be shipped via the States in bond, there being no through road or means of communication of any kind outside of one trail, on the British side, between the east end of the district and the Columbia river.

There is not a single money order office south of Kelowna. This fact has been pointed out in this paper before. The post office authorities are proverbially slow in meeting the wants of the section of the interior, and no great haste in supplying these requirements can be expected of them.

EUROPEAN GOSSIP.

Efforts Being Made to Prevent the Spread of Cholera in Germany.

Position of the British Cabinet on the Abolition of the House of Lords.

Berlin, Aug. 28.—If credence can be given to a popular report, the position of Doctor Johannes Miquel, the Prussian minister of finance, is shaken in consequence of the differences of opinion which have arisen between him and Chancellor Caprivi, and which have found public utterance in mutual acrimonious attacks in the semi-official journals during Emperor William's absence from Berlin.

It is now estimated that the project is entertained among several strong mining men to erect a smelting plant on the Columbia river, somewhere north of Northport, but on the Canadian side of the line, where the ores of the Nelson, Sloan, Trail creek and Boundary creek districts could be handled together.

The idea is that the latter ore, containing a large percentage of copper, could be used in the reduction of the former. There are not being sufficient variety in the Sloan and Nelson ores, or those of the Trail creek district alone. The Trail creek ores also, we understand, do not contain sufficient copper to make them selves.

THE HANDY REVOLVER.

An Employee Shoots his Employer Down on the Street.

Atlanta, Ga., Aug. 25.—Alexander Carr emptied a five chambered revolver into F. O. King on South Bond street this afternoon.

Who would not be a domestic servant at Rideau hall just now? It is, of course, pure fiction to say, as some have done, that their excellencies give up their drawing room to the servants once a week, and also dine with their entire household. But it is a fact that the Haddo club, which includes Lord and Lady Aberdeen and every member of the household, down to the humblest of the servants, holds classes in the evenings from 6 to 7.30 or three times a week in wood carving, French painting, singing and needlework.

Mr. Geo. Rumberger has made a new location east of the Knob hill. The character of the ore appears to be the same as the rest in Greenwood and the surface showing is big. Mr. King, of the Cariboo mining company, is making the necessary arrangements for working the hydraulic claim on Back creek.

Mr. Atwood is prospecting the Oro for Mr. James Douglas, and the open surface cuts disclose what may yet turn out to be a very fine vein of ore, at least present indications point to such a result.

Mr. Schofield, who is doing assessment work on the Number Seven, in Atwood's camp, is taking out good ore near the old shaft. A new shaft is also being sunk on the claim on a three foot vein. The ore is galena carrying gold and silver.

MISCELLANEOUS.

A locomotive is 15 years and earns about \$300,000.

Bricks used to be from the tower of Babel are plentiful at Birs Nimrod, Babylon.

Steel barrels, made from shims ranging in thickness from one-sixteenth to a quarter of an inch, are coming into use.

The first advertisement published in the Baltimore American was the sale of a piece of land by General George Washington, 1773.

Women smoke almost as much as men in Russia, and all the railway train smoking cars for ladies, which are well patronized.

The latest setting for a scarf pin is a miniature pipe of gold, from the bowl of which emerges a bubble in the form of a tinted pearl.

A bullet from one of the new rifles in use in the Italian army will penetrate five inches of solid ash at a distance of three-quarters of a mile.

The sum of \$50,000 was paid by the German government for a musical once owned by Pope Leo X. It is said to be the highest price ever paid for a book.

Living in Japan is probably cheaper than in any other country in the world. For \$250 a year a man can live in a comfortable house, employ two servants and have the best kind of food.

Cats have been trained in New Zealand to pursue and destroy rats, which are so plentiful as to be a nuisance. White tom cats with pink eyes made the best hunters and retrievers. Maltese tabbies have been taught to point the same as a field dog. While standing in a rigid position, with the right forefoot raised, they growl in a most frightful manner.

In the native quarters of the towns of India the strange spectacle may be seen of a butcher seizing a piece of meat in his hands and cutting it in two with a stroke of his knife held between the first and second toes of his foot. The shoemaker uses no last, but turns the finished shoe in the size by his feet while his hands are kept busy in shaping it. So the coppersmith holds with his great toe the board he is cutting, and the woodturner handles his tools as well with his toes as with his fingers.

The ankle of the Hindoo is the articulation of the bones of the foot permit some lateral motion. Then the toes possess a surprising mobility. The great toe can be moved freely in all directions, and the first and second toes are separated by a wide space, sometimes as much as 5/16 in. across at the base of the toes and 2 1/2 in. at their extremities. The articulation of the hip is also peculiar, and this renders it easier to use the toes in handling the objects by enabling the Hindoo to sit in a squatting posture much more comfortably than we can do. A similar formation of the feet and toes is found among the Annamese, but it is not, as might be supposed, a common thing among barbarous and savage tribes. One naturally thinks of the resemblance to a monkey which a human being using both hands and feet must present, and yet Mr. Roegnitz is careful to point out the fact that the Hindoo foot is not at all like the foot of an ape or monkey. The great toe is not opposed to the other toes like a thumb, as occurs with a monkey, and accordingly the special dexterity of the Hindoo is not to be taken as an indication of simian descent.

TOILET SOAP. FOUR GREATER COMFORTS. If she does, see that the wash is made Easy and Clean by getting her SUNLIGHT SOAP, which does away with the terrors of wash-day.

Experience will convince her that it PAYS to use this soap.

FEATHERWEIGHT CHAMPIONSHIP. New York, Aug. 23.—George Dixon and Jimmy Marshall, who claims to be featherweight champion of Australia, were matched today to fight for record breaking and the featherweight championship of the world.

ELIEN BRICKS THIRTY-ONE. An eleven captained by W. A. Ward defeated thirty-one at the Caledonia grounds yesterday. The score was 100 to 131.

ATHLETICS. HAYWARD WINS FROM HARRISON. Hayward, of Vancouver, won the general athletic contest from Harrison, of Victoria, at the Caledonia grounds on Saturday afternoon. It opened with a 220 yards hurdle race, which Harrison won by a foot; time 30 seconds. Harrison won the quarter mile run by three feet in 70.3-4 seconds. Hayward won the 100 yards run in 10.3-4 seconds, beating Harrison three feet. Hayward won the 500 yards race by 100 yards. Hayward won the broad jump with 17 ft. 7-1/2 in. against 17 ft. 4-1/2 in. This gave four events and the match to Hayward.

THE TURF. DIBRETTUM FALLS. Chicago, Aug. 23.—In his trial against time today, rather in his exhibiting trial, the great Dibrettum did no better than 2:20 1/2. Yet the track and weather were the best of the week for record breaking. Something evidently is wrong with the black wonder, although horsemen are divided in opinion as to whether the owners of the horse are merely reserving him or whether he is not up to his last year's speed. He was given two warmups up before his final trial today, and in one of those was credited with making a 2:08 1/4, a figure that the official timers refuse to confirm. The last quarter was said to be :30 1/2.

THE RIFLE. B. C. TEAM. If the British Columbia team makes a good showing at the exhibition at Toronto they will return home loaded with honors. Yesterday they won the principal events of the Ontario provincial meet, the Ontario team match, and the Ontario team match, for which very handsome and valuable prizes were offered. The scores were Battalion match—B. C. G. A. winners of the Tat cup—204. Forty-Eight Highlanders—106. Eleventh Battalion—191. Company Match—No. 4 Company, B. C. G. A.—Westminster, winners of the Brasserie cup—364. Twelfth Battalion—361. Forty-Third Battalion—346.

SPREADING OUT. Bob Johnson, single sculling champion of British Columbia and winner of the single scull race at the regatta of the Association of Amateur Oarsmen of the Pacific Coast held last week at Seattle, has issued a challenge to row any bona fide amateur for the championship of the Pacific coast.

HOW HE GOT HIS AD IN. A certain religious congregation in England wanted to procure new hymn books, but they were very poor and could not afford to pay for them at the ordinary price. They understood, however, that a certain great advertising house, a business house that made patent medicines, was willing to furnish hymn books at a penny each, if they would allow some advertisements to be inserted in the books. They thought the offer would be no special harm, that they might have a few special pages of advertisements bound up with Watts and Doddridge. They agreed to the proposition. The books came duly, and got down to the church on December 24. On Christmas morning the model Christians, who had no thoughts of anything but religion, got up to sing. Their pastor gave out by the first line a very familiar hymn. Immediately the congregation arose to their feet, and in a few seconds they were agog to find themselves singing: "Hark the herald angels sing, Searchers of all hearts are just the thing, Peace on earth and mercy mild, Two for man and one for child."

It quickly cures. Cuts, Burns, Chilblains, Bruises, Corns, Blisters, Swellings, Ulcers, Sore Throat, Old Sores, Lame Back, Pimples, Rheumatism, Pustules, Caked Breasts, Eruptions, Dislocated Joints, All Contracted Muscles, and all Unpleasant Sores.
