In the budget which the Minister of Finance has presented to this house and which we at this very time are considering, will be found, in a very conspicuous way, the evidence of the intention of which I have just been speaking. Will the Prime Minister say that the additional 2% increase in the excise on all commodities coming into Canada, the 200% increase over the 1% excise imposed last year, is not intended as something which will help to bring into being an imperial Zollverein at the forthcoming Imperial Economic Conference?
